List of Catalogues, Bloomington Nursery.

- General Descriptive, 100 pages, Illustrated, 10 cts.
- Wholesale Price List, for Nurserymen, Dealers and large Planters; semi-annual, 24 pages.
- Flower and Vegetable Seeds, and Greenhouse, Bedding and Garden Plants, 112 pages, Illustrated, 10 cts.
- Bulbs and Winter-Blooming Plants, Illustrated, 40 pages. Fall.
- List of Colored Plates of Fruits and Flowers. All five Catalogues for 20 cts.

TABLE

Showing the number of Plants produced by a given quantity of Seed, and the quantity of Seed required for a given amount of land.

I oz. of Artichoke,	600 plants.
I oz. of Asparagus,	1,000 do.
I oz. of Brocoli, Cabbage, Cauliflower, Egg - Plant and Tomato,	4,000 do.
I oz. of Celery and Lettuce,	10,000 do.
I oz. of Leek and Pepper,	3,000 do.
I oz. of Endive,	
I oz. of Beet will sow one rod.	•
½ oz. of Carrot will sow one rod.	
I oz. of Corn Salad will sow two rods.	
2 oz. of Parsley, Parsnip and Salsify, should be allotted to every three	rods.
I oz. of Onion contains 9,000 seeds, and will sow one rod, requiring	from five to
eight pounds to the acre.	
4 oz. of Radish, broadcast, will sow three rods; if sown in drills,	one-half the
quantity will be sufficient.	
8 oz. of Spinach, broadcast, will sow five rods; if sown in drills, one-h	alf the quan-
tity will be sufficient.	•
I oz. of Cucumber will plant 200 hills.	
I oz. of Melon will plant 120 to 150 hills.	
I oz. of Watermelon will plant 40 to 50 hills.	
I oz. of Squash will plant 50 to 100 hills.	
I qt. of English Beans will plant about 60 feet of row.	
1 qt. of Dwarf Beans will plant from 230 to 260 feet of row, or 350 to	400 hills.
1 qt. of Pole Beans will plant from 200 to 250 feet of row, or 100 to 4	oo hiils.
1 qt. of Field Pumpkin will plant from 500 to 600 hills.	
1 qt. of Peas will plant from 150 to 200 feet of row.	
5 to 8 bushels of Potatoes will plant about I acre.	
1/2 bushel of Sweet Potatoes will produce 20 bushels.	
I pound of Turnip is sufficient for I acre.	

SUPPLEMENTARY

CATALOGUE.

By F. K. PHOENIX, BLOOMINGTON NURSERY, ILL.

SIX CATALOGUES FREE FOR 20 CENTS. TO

New and Desirable Plants.

ABUTILON.

Santana Alba—New variety, with large pure white flowers. 35c each; \$2.50 per dozen.

AGERATUM.

Imperial Dwarf—Low-growing variety of Mexicanum; porcelain blue flowers, constant bloomer. 25c each; \$2.50 per dozen.

Lasceauxii—Very novel, rose or pink color, blooming throughout the season. 25c each; \$2.50 per dozen.

White Tom Thumb—Beautiful dwarf, (6 inches,) flowering profusely the entire season. 25c each; \$2.50 per dozen.

ALTERNANTHERA.

Latifolia—A broad leaved variety, beautifully marked with yellow, pink and bronze, like autumn leaves. Well adapted for baskets or bedding out. 25c each; \$2.00 per dozen.

AMPELOPSIS.

Veitchii—Pleasing little climber; in fall the leaves change to beautiful crimson carmine. Nice young plants 25c each; \$2.50 per dozen.

Arabis Alpina Variegata—Neat, dense, low-growing; beautiful for borders and baskets. 25c each; \$2.50 per dozen.

BOUVARDIAS.

Aurantiaca—Bright orange; Delicata—Flesh color; Elegans—Scarlet carmine; Floribunda—Orange scarlet; Leiantha—Dazzling scarlet; Hogarth—Rich scarlet; Van Hontii—Crimson. 20c each; \$2.00 per dozen; \$8.00 per hundred.

BROWALLIA.

Very handsome, profuse blooming, half hardy, annual.

Cerviakowskii-Blue with white center; beautiful.

Elata Alba-Pure white.

Elata Grandiflora-Large flower, sky blue.

15c each; \$1.50 per dozen; \$7 per 100.

CARNATIONS.

Monthly—Twelve varieties. 25c each; \$2.50 per dozen; \$15 per 100.

Hardy—Seedlings from named, double varieties, carefully selected; fine plants. 20c each; \$2 per dozen; \$8 per 100.

CERASTIUM TOMENTOSUM.

White foliage and flowers, small, narrow leaves, trailing habit. Suitable for baskets or stands. Will doubtless bed out well. 25c each; \$2.00 per dozen.

CISSUS DISCOLOR.

Beautiful climber for greenhouse or baskets. Leaves richly shaded, with brilliant markings. 25c each; \$2 per dozen; \$8 per 100.

CINERARIA ASPLENIFOLIA.

New, free, compact growing, white leaf plant, contrasts finely with Coleus, Achyranthus, &c., for bedding. 50c each; \$4.50 per dozen.

COBEA, SCANDENS ALBA.

White flowering variety of this well known, beautiful climber. Quite a novelty. 75c each.

DURANTA BAUMGARTII, VARIEGATA.

A beautifully variegated plant. Belongs to the Solanums. Dark green leaves with golden yellow band. 25c each; \$2.50 per dozen.

FIGS. Twelve Varieties.

Angelique; Brown Ischia; Brunswick; Brown Fig; Castle Kennedy; Early White; Hy. Shaw; Large Black; Lee's Perpetual; White Ischia; Florentine; White Versailles; young, stocky plants. 20c each; \$2 per dozen; \$12 per 100.

LAGERSTREMIA. (Crape Myrtle.)

New Crimson—Deep bright crimson, profuse bloomer. Strong plants. \$1 each. Fine, young plants, 35c each; \$3 per dozen.

New White-Splendid variety. Strong plants, \$1 each; young plants, 50c each.

LYCHNIS.

Flos Cuenli, Alba—Flowers pure white, 2 inches in diameter; blooms from June to October. Valuable for summer boquets. 30c each; \$3 per dozen.

Flos Cuculi, Rubra—Double red, constant and free bloomer; hardy. 25c eacle, \$2.50 per dozen.

LOBELIAS.

Neat, low growing, well adapted for edgings, baskets and small beds. Ioc each; \$1 per dozen; \$5 per Ioo.

Alba-White.

Blue King—Blue, white center.
Compacta Alba—Pure white.

Gracilis-Pale blue.

Marmorata-Marbled, blue and white.

Paxtoniana-White, blue edge.

Rosea-Rose colored.

Speciosa-Deep blue; beautiful.

MIGNONETTE.

Grandiflora-New, large flowering variety. 15c each; \$1.50 per dozen.

MYOSOTIS. (Forget-me-not.)

Miss Eugenie—Beautiful, new variety; lilac blue, yellow center. 25c each; \$2.50 per dozen. The following sorts at 15c each; \$1.50 per dozen; \$8 per 10o.

Alpestris-Blue.

Palustris-White and blue.

Azorica-Dark blue, fine.

Sylvatica-Old "true blue" variety.

MYRSIPHYLLUM ASPARAGOIDES. (Smilax.)

Unequaled in its grace and beauty, as a climbing or drooping plant, for baskets, wreaths, and trimming. 25c each; \$2.50 per dozen.

SCUTTELARIAS.

Very desirable greenhouse or parlor plants, blooming from October to March; flowers resemble the Salvia. **Mocetana**, scarlet crimson; **Purpurea**, purple; **Pulchella**, crimson. Price 35c each; \$3.00 per dozen.

STOCKS-TEN WEEK.

Well known universal favorite. The following are among the best: Large Flowering Pyramidal, Semperflorens or Perpetual, and Royal Gem. Price 15c each; \$1.50 per dozen; \$7.00 per hundred.

NEW VERBENAS.-1872.

The following new varieties have been selected from a large number of seedlings, for their pleasing and distinct colors, vigorous, healthy habit, and free blooming.—Price 25c each, \$2.50 per dozen. The whole set of 20 varieties for \$3.00.

Bloomington-Reddish pink, dark crimson eye.

Beauty—Fine white, splendid habit. Carrie P.—Scarlet, large white eye.

Chatterbox.—Bright pink, white eye, close habit.

Catherine—Deep purple, black eye, very fine.

Evangeline—Large, white tinted blush, fragrant.

Gregory—Light blue striped pink, peculiar and pretty.

Guilsboro—White, speckled and striped, purple center.

Hazel—Peculiar lavender blue.
Lucy—Pretty pink, deep crimson eye.
Mackinaw—Fine magenta, close habit.

Mrs. Jackman. --- Large scarlet, shaded crimson.

Miss Fanny.—Similar to Boule de Neige, more vigorous, flowers finer.

Mayday—Light blush, with rich, large carmine center, very fragrant.

Normal—Splendid deep blue, fragrant. Nonsuch---Large. beautiful light purple, white edged.

Regulator—Rich, deep scarlet, white eye.

Surprise (Baller's)—Velvet purple, distinct white eye.

Striker—Pure white, striped scarlet and carmine, not liable to sport.

Wooloo-Very distinct yellowish white.

NEW VERBENAS, (Henderson's Collection, 1872.)

Price 25c each, \$2.50 per dozen; the whole set of 30 varieties for \$4.50.

Ball of Flame, bright scarlet, yellow eye. Beauty of Sherwood, the best scarlet we

have seen.

Bedimah, dark maroon, white eye.

Bessie Lee. cherry color, vellow eye.

Bessie Lee, cherry color, yellow eye. Bicolor, blush ground, violet eye. Cerulea, large, fine blue. Cicero, pink, white eye.

Conchiftora, shell-like pink, white eye. Delight, lilac, violet center.

D'Israeli, purple, pink and white.

D'Israeli, purple, pink and white. Eximia, maroon, white eye.

Grandeur. rich crimson, yellow eye. London Pride, large, claret-colored, vio-

let center.

Marengo, deep crimson, white center.

Mentor, large, purplish blue, white eye.

Maid of Athens, scarlet, rose center.

Mrs. E. Chellis, shaded lilac and white.

Miss Annie Massey,—violet, shading to white.

Miss Elizabeth, purplish crimson.

Plantagenet, scarlet shaded pink, extra

Pre-eminent, large, rosy salmon, white eye.

Sedan, large blood red.

Snowball, the finest white yet raised by us.
Speckled Gem, white, carmine, and crimson-striped.

Styrilla, dark velvet-like maroon. Styx, violet crimson, yellow eye. Symmetry, bright rose, perfect form.

Quadricolor, pink, violet, white, and crimson.

Village Maid, white, speckled scarlet. Wonder, maroon and white.

NEW VERBENAS. (Vestal's Collection, 1872.)

Price, 25c each; \$2.50 per dozen; the whole set of 36 varieties for \$5.

Ascendency, rich crimson, white eye.

Ace of Trumps, crimson maroon, large yellow eye.

Aurea Variegata, red and white striped, fragrant.

Beatrice, cerice, pink shaded, with dark maroon eye, novel.

Benoni, maroon velvet shade.

Beauty's Bloom, dazzling scarlet, large white eye.

Blue Gem, rich deep blue, square white eye, healthy, robust habit, a fine bedding variety.

Brilliantissima, brilliant flame-colored scarlet, large, distinct white eye, large and fine truss, and free flowering habit, extra.

Bride of Abydos, pure white, light magenta eye.

Chance, rose, carmine, large light colored eye, large florets.

Clio, deep claret, distinct large light yellow eye, effective.

Day Dream, deep cherry crimson.

Delight, ground color, cochineal red, striped and flaked with crimson, novel.

Éclat, mauve, large white eye, free flowering habit, extra.

El Enchantido, vermillion, red white eye.

Exquisite, light lilac, mottled and striped with purple.

Favorite, dark crimson, large truss.

Figaro, white, splashed and striped with dark red.

Great Western, deep crimson, robust habit.

NEW VERBENAS,—Continued.

Hogarth, scarlet crimson, light orange eye, profuse blooming habit.

Imperialis, bright pink.

Honey Locust, 10 lbs. \$4.

Paulonia Imperialis,

Red Bud-American,

White Birch,

Lalla Rooke, darkest maroon, extra. Ledia, dark cherry crimson.

Magnet, white striped and shaded with rose.

Model, flesh color, shaded with rose, fine

Neatness, cochineal crimson, yellow eye. Old Wayne, dazzling rose scarlet, large light orange eye, extra.

Orient, distinct carmine, self-color.
Omega, cherry crimson, dark centre.

All three sets complete, for \$10.

Queen of the West, magenta, yellow

Rose d'Amour, beautiful rose, distinct white eye.

Sir Phillip, deep crimson, white eye, superb.

Silver Belt, pure white, large showy truss, strong, robust, healthy, free flowering habit, a showy bedding variety.

Sybil, crimson maroon, yellow eye.
Spangle, spangled and striped with dark

waverly, glowing salmon scarlet, white

VASE, GARDEN, AND BASKET PLANTS

PROPAGATED AND FOR SALE BY

F. K. PHOENIX,

BLOOMINGTON NURSERY, BLOOMINGTON. ILL.

PRINTED AT THE LAKESIDE PRESS, CHICAGO,
R. R. DONNELLEY, 103-107 CANAL STREET.
1872.

TO PURCHASERS.

REMEMBER, the Seed trade of a year has to be done in a few months, and in spite of the utmost precautions, errors will occasionally appear. When such do occur, you will please inform me of the fact, and corrections will be made immediately.

IT SAVES VALUABLE TIME to write briefly as possible, and your remarks separate from the order. You have no conception of the time it takes to pick out an order written possibly over four pages.

Free By Mail.—I propose forwarding all Seeds free to my customers, at the prices named, when full amount is sent with the order. By this arrangement you are enabled to supply yourselves with Seeds true and genuine, avoiding those peddled from town to town on commission.

GIVE SPECIAL DIRECTIONS.—When quantities of Seeds are ordered too large to send by mail, please state by what conveyance they are to be forwarded, and to whom consigned. I will prepay express charges to any Railroad point reached by the United States and American Merchants Union Express Companies, in the States of Illinois, Wisconsin, Minnesota, Iowa, Missouri, Indiana, Ohio and Michigan. This does not include articles offered at net prices on second and third pages of cover. When no particular route is designated goods will be forwarded to the best of my judgment, and in this case no responsibility is assumed after leaving my office.

PLAIN DIRECTIONS.—Whatever else you do, do not neglect this. I can possibly make out the names of the Seeds, Bulbs and Trees, if badly written; but your Name, State, County, and Post Office, write in good round text. I frequently receive letters containing money, with no name or address. To the writers expecting their orders filled, it is a disappointment; to me a positive loss. Except in rare instances, no order is kept over the second day.

SEND YOUR MONEY by Post Office Order. These you can get at most post offices; or by draft payable at Chicago, New York or St. Louis, or in greenbacks by express. If neither of the above means are available, place the amount in a letter, properly address it, and have it registered at the post office. Small amounts, \$2.00 or less, can be forwarded without registering.

DO NOT WRITE TO ASK if I have or can suppy such an article, if catalogued; but, if wanted, order it at once. In the early part of the season I can supply all the varieties named. As the season advances, some varieties will be sold out; then, if not advised to the contrary, I shall supply others, but never with an inferior variety.

ONCE MORE. — Look, before sealing your letter, that your Name, State, County, and Post Office are legibly written. In cities, always give street and number, or number of P. O. box.

THE FLOWER-GARDEN;

CONTAINING DIRECTIONS FOR THE CULTIVATION OF ANNUAL, BIENNIAL, AND PERENNIAL FLOWER-SEEDS.

"Flowers," said Henry Ward Beccher, "are the sweetest things God ever made, and forgot to put a soul into." The love of Flowers is inherent in man. It is the seed of which love is the fruit, an element of true religion. Flowers have been aptly called the smiles of God.

The term "annual" is given to those plants which are sown in the spring, bloom and seed in the summer, and afterwards perish.

HARDY ANNUALS are so called because they do not require any artificial heat at any period of their growth, and are capable of enduring any ordinary weather from May to November. Many of them may be sown in the autumn; and the young plants will make their appearance early in spring, and flower stronger than when the sowing is deferred till spring.

HALF-HARDY ANNUALS are those that require the aid of artificial heat to assist germination; but this is not absolutely necessary if the sowing is deferred until the ground is warm,—say the last of May, or the 1st of June. But to gain time, and insure an early and abundant bloom, it is best to plant early, and assist the growth by a gentle artificial heat. Some of the most magnificent annuals are embraced in this class, of which the Asters, Zinnias, Stocks, Antirrhinums, and Balsams, are examples. The most convenient and the simplest mode of doing this is the ordinary hot-bed of stable manure, which gives a gentle bottom-heat, quite sufficient for any of this class. Its construction is simple, and generally understood by most owners of a garden.

BIENNIALS AND PERENNIALS.—Biennial and perennial plants are almost indispensable additions to the flower garden, displaying their blossoms early and late, succeeding and even flowering with the spring bulbs, and continuing long after the frost has destroyed the hardiest annuals. They are so easily cultivated, and require so little care, that they must be ranked as the most permanent and showy objects of the flower-border.

THE SOIL AND ITS PREPARATION.

The best soil for annuals, and for most flowering plants, whether biennials or perennials, is a light, rich loam. In such they grow readily, and attain to great perfection of bloom, with but little care. By the application of proper manures, or sand or clay, the soil can be brought to such a condition as to answer all the purposes of a flower-garden. Deep and thorough trenching in the autumn, if possible, and the application of old decayed manure or leaf-mould, will give a well prepared and suitable soil.

Where the soil is too light, a thin layer of clay, if to be had, should be spread over the surface in the autumn, and dug in, after being pulverized by the winter frosts, in the spring. This, with the use of thoroughly decayed manuse, will keep the garden in good condition. No unvarying rules can be given; the soil of a good garden should be deep, well pulverized, friable and rich.

Our hints are intended for the mass of the people who love flowers, and do not wish to incur great expense in the gratification of their taste. To these we recommend, amongst other works published, Breck's "New Book of Flowers," Buist's "Flower-Garden Directory," Bridgeman's "Florists' Guide and Gardeners' Assistant," and Henderson's "Practical Floriculture."

PERIOD FOR SOWING,

This must depend much upon the season, as well as the locality. As a rule, the proper time to commence sowing is about the middle of April, though a few sorts may be planted as soon as the ground can be got ready; and, for a succession, the sowing should be continued until June. In the Southern States, of course, January, February or March will be the time to sow, as they correspond with April, May, and June of the North. To avoid all danger of injury, the sowing may be deferred till the last of April. Because we recommend April, it is not to be understood the sowing must be made at that time. If sown in any part of May they will flower later, but abundantly, throughout the latter part of summer.

It is the great error to cover too deep; and the cause of more than half of the complaints against seedmen of selling old and worthless seeds comes from inexperience or want of judgment in sowing. As a general guide, all large seeds, such as Sweet Peas, Lupins, etc., may be sown two inches deep. It is absolutely necessary, when sowing flower seeds, all thoughts of corn and potatoes should be dismissed from your mind. I have known the most delicate seed, fine as dust, planted two inches deep. Be sure "it is up,"—the plants wish to grow. Think for a moment; these fragile plants having to lift two inches of, it may be, wet sodded or possibly hard - baked soil, and then do not wonder the seed did not grow. There are no laws that change not, but as the nearest approach to perfection I would recommend the seed be sown eight times the depth of itself; avoid fancy rings, unless to please the children, but sow the seed level over the surface, covering as directed. Another advantage is to cover the seeds with the clipping from the lawn, it prevents the seed from drying, and the rains from washing it up. Neither sow too thick, as it causes a feeble growth, and poor, weakly, sickly flowers. Sow as careful as you will, they will in all probability come up too thick; if so, thin them out liberally; if varieties that will bear removal, plant them out in vacant places, and if more than you require, give some to your poorer neighbors having the taste but not the means. Another fault, too common, I would point out; tall flowers are often put in front, and dwarf ones behind; this is easily remedied; if you would divide your flower border into four parts, in width, and mark each packet before sowing, 1, 2, 3, 4. No. 1, of course, would be the dwarf, and No. 4 the tall, and the intervening numbers of intermediate height. The height of each variety is given in my Catalogue.

As soon as the seedlings have made three or four leaves, and are an inch high they should be thinned out. Tall-growing plants with spreading branches will require more room than slender-growing dwarf kinds. Stir the soil around the plants from time to time; and, if crowded, a second thinning will be of great benefit to those that remain. If the growth is not strong, from the nature of the soil, apply occasionally a very small amount of guano or bone-dust.

Transplanting should, if possible, always be done in cloudy weather, and towards evening. If the soil is dry, the plants will require watering to settle the earth around the roots; and, if warm, sunny days succeed the operation, they will root all the better to have shade for a day or two. All large-growing plants should be transplanted singly; but many of the smaller may be removed in patches, without any trouble. After the plants are established they will need no other care than to tie up the taller-growing sorts to stakes, to prevent the wind and rains from beating them down, and injuring their blossoms.

HOT - BEDS.

It seems almost superflous to describe a hot-bed; yet there may be some to whom the information may be of service. Select a southeast aspect as preferable, taking out the soil to the depth of eighteen inches, the size you require, a few rough boards as a frame a foot or eighteen inches high, filling it up with stable manure, well shaken as it is placed in, cover with six inches of good mellow loam, or light soil, allowing it to stand two or three days, till the gross heat has passed away. Now sow your seeds as previously directed. As the seedlings appear above ground give air by tilting the sashes at the back; during cold nights a mat should be thrown over the frame to prevent the loss of heat—being as careful on bright, sunny days to shade the plants from the burning rays of the sun. A good preventive is to give the glass a slight coat of whitewash. As soon as the plants are large enough they may be transplanted in the open ground, but before doing so they should be well hardened off, and if you have a cold frame, similar to the hot-bed without the manure, and placed on the surface, it would be as well to plant them in this for a week or two, and by this seeming delay you would gain time.

A NURSERY.

As failures in some cases are unavoidable, it is advisable to have some few spare plants to supply any deficiency; this is easily done by making a small bed, and sowing a few seeds for this special purpose.

INDUCEMENTS FOR THE FORMATION OF CLUBS.

I offer the following inducements to purchasers in large quantities, or for the formation of clubs, by which a great saving may be effected. The seeds will be forwarded, by mail, post-paid, to any address in the United States, on receipt of the amount of the order.

Purchasers remitting \$1.00 may select seeds, in packets, at Catalogue prices, amounting to \$1.15
" " 2.00 " " " " 2.25
" " " 3.00 " " " " " 3.50

6.6	4.6	20.00	6.6	66	6.6	6.6	26.00

No variation whatever will be made from the above rates.

I wish it distinctly understood by correspondents, that the above discount will be allowed only upon flower and vegetable seeds in packets. Seeds when ordered by the ounce or pound, plants, roots, or bulbs, will not be included.

COLLECTIONS OF FLOWER - SEEDS, POSTAGE PAID.

I have made up collections of flower-seeds, which I would recommend to those not well acquainted with the different varieties. They contain those only of easy culture, and brilliant, showy flowers. To beginners in the cultivation of flowers, these collections are confidently recommended.

In all cases I prefer the purchaser should make his own selections; it will appear possibly tedious to do so; once done, it will thereafter be a pleasure.

FLOWER SEEDS.

MAKE HOME BEAUTIFUL.

Make your home beautiful, bring to it flowers;
Plant them around you to bud and to bloom;
Let them give life to your loneliest hours,
Let them bring light to enliven your gloom.
Then shall it be when afar on life's billow,
Wherever your tempest-tossed children are flung,
They will long for the shades of the home-weeping willow,
And sing the sweet song which their mother had sung.

ANNUALS.

ABRUNIA. NAT. ORD. Nyctaginiacea.	
A charming trailing plant, about six inches high, with verbena-like heads of sweet-scented flowers. Very effective in beds, rock-work, or in baskets suspended in a conservatory; growing freely in any light, rich soil, and flowering from August to October. This seed should be started in a hot-bed, or under a glass. Half-hardy annual.	RICE.
ABRONIA UMBELLATA. Rosy lilac	.IO
ADONIS. NAT. ORD., Ranunculaceæ.	
The flowers are very brilliant, but small, and not numerous compared with amount of foliage and size of plant; bloom for a long time, growing about one foot high. Set twelve inches apart. Hardy annual.	
ADONIS ÆSTIVALIS. Summer; scarlet	.05 .05
AGERATUM. NAT. ORD., Compositæ.	
Valuable hardy annuals for beds or borders, and exceedingly useful for cut flowers; continue to flower the whole summer, and do well in almost any soil; flowers small, in clusters. Good for winter flowers in the house.	
AGERATUM MEXICANUM. Blue. 1 foot	.05 .05
" CŒLESTINUM (PHALACR.ÆA) TOM THUMB. Light blue; of compact habit; abundant bloomer; fragrant. I	.05
foot	.05

A	GROSTEMMA. NAT. ORD., Silenaceæ.	
cutting. Flowers like	ming, hardy annuals, making a showy bed, and fine for a pretty single pink, on long slender stems; about Transplant well, and should be set five or six inches	s.
AGROSTEMMA, CO	ELI ROSA. Fine deep rose-color	o
DV	VARF. Beautifully fringed; rose, white centre	5
	ALYSSUM. NAT. ORD., Cruciferæ.	
on rock work, or the ope	al, free flowering little plants, either for growing in pots, en border; blooming nearly the whole summer; fragrant. Hardy annual; flowers small and white. 6 in	5
AMA	ARANTHUS. NAT. ORD., Amarantacea.	
foliage. Useful, in mar	growing about eighteen inches high, with finely colored ny situations, as a background of a flower border, or for hedge, or a bed on the lawn.	
" TR	OLOR. Crimson and green variegated foliage	
tran	splanted	1
erou	will grow in any soil, of bushy habit, covered with num- is half drooping bright red flower spikes, a beautiful trast with the reddish grey metallic, reflecting foliage	5
Λ.	NAGALLIS. NAT. ORD., Primulacea.	
Very desirable for sm	nall beds, edgings, baskets, etc., growing about six inches in a bed thickly, they cover the ground with a constant

ASTER. NAT. ORD., Compositæ. Notwithstanding the vast improvement of this fine class of Flora's favorites,

PER PKT PRICE

.05

every season is offering us fresh novelties. From the single flowers of past years, we have them now nearly as large as a Pæony, and as double as a Chrysanthemum, or Dahlia. For early bloom, sow in a hot - bed, or if not favored with one, sow in a box putting it on the sunny side of the house, and these will supply all you require for planting; for a succession, sow out of doors, and when large enough transplant, the dwarf varieties six inches apart, each way, the larger ones twelve inches. They like a good rich soil, and if a dry season a good mulching would be beneficial. ASTER, TRUFFAUT'S PÆONY-FLOWERED PERFECTION. large, beautiful flowers; petals long, a little reflexed; one of the best. Twenty inches to two feet in height. Finest colors, mixed LA SUPERBE. A magnificent, large, bright rose-colored flower, often more than four inches in diameter, of the pæony-flowered class. Twenty inches in height..... .20 NEW ROSE. A magnificent class, between Truffaut's Perfection and Large - flowered Imbrique. About two feet in height; very robust; with large flowers, and double at the centre; the outer petals finely imbricated, and of great substance. Mixed IMBRIQUE POMPON. A very perfect aster; almost a globe, and beautifully imbricated; eighteen inches. Finest, mixed.

COCARDEAU, OR NEW CROWN. A fine flower: very double; .IO the central petals being of a very pure white, sometimes small and quilled, surrounded with large flat petals, of a bright color, as crimson, violet, scarlet, etc.; eighteen inches. Finest colors, mixed_PÆONY-FLOWERED GLOBE. A very fine variety, and the earliest of the asters, - at least two weeks earlier than Truffaut's Paony - flowered; flowers very large; plant branching and strong, and does not require tying. Finest, mixed.....

TALL PYRAMIDAL-FLOWERED GERMAN. Extra; late; branching good habit; fine grower; needs no tying..... .IO GIANT EMPEROR. Very large flowers, but not numerous. Mixed colors .15

Flowers as large as the Emperor Aster; habit pyra-VICTORIA. midal; nearly two feet high; each plant bearing from twenty to forty flowers. Extra, mixed colors. .20

CHRYSANTHEMUM-FLOWERED DWARF. A most desirable class growing only about one foot in height; with large, very perfect flowers; a free bloomer; later than other varieties, and desirable on this account, as well as for its great beauty. Mixed CHRYSANTHEMUM - FLOWERED DWARF, SNOWY -

This is a very superb snow-white variety; flowers WHITE. very perfect_ .15 BOLTZE'S NEW PYRAMID DWARF BOUQUET. A novelty;

each plant looks like a little bouquet of flowers set in the ground. Fine for pots, edging, or filling small beds. Set plants five inches apart. A beautiful variety; many colors; mixed__ SHAKSPEARE. This new aster is said to be the finest of all the

46 dwarfs, giving a hundred flowers to a plant. Flowers very double, of the brightest colors, and of a regular imbricated form. Useful for bedding, or conservatory decorations. Mixed colors__

DWARF IMBRICATED POMPON, GLOBE-FLOWERED. A compact bush, covered with globular flowers. Finest colors, mixed HEDGE-HOG OR NEEDLE. Petals long, quilled, and sharply-pointed; very curious and fine. Two feet. Colors mixed.

NEEDLE-PERFECTION. New Colors; very delicate. Finest .IO

.25

66 REID'S NEW GLOBE-QUILLED. This is the finest quilled aster grown. The plant is tall, and the flowers fine. Colors mixed ____ .IO 66 MÏXED GERMAN .IO GOOD MIXED....

	Pkt.
ASPERULA AZUREA SETOSA. A profuse blooming hardy annual of dwarf, compact habit, and covered with clusters of very small, light blue, sweet-scented flowers.	Price.
AUBERGINE (EGG-PLANT). NAT. ORD., Solanaceæ.	
These varieties are not the eatable fruited kinds. The white and scarlet are sometimes grown in pots, and are very interesting, being covered in autumn with beautiful egg-shaped fruit. The scarlet variety is a great novelty. They succeed in any warm location. Half-hardy annuals. AUBERGINE, WHITE-FRUITED. 1½ feet	
BALSAM (IMPATIENS). NAT. ORD., Balsaminacea.	
One of the most popular, and the most beautiful of our half-hardy annuals; but a rich soil and good culture are needed to bring it to perfection. Sow in a frame, or in a sheltered bed in the garden, in the spring as soon as the weather is rather warm. Transplant as soon as the second leaves have made a little growth. Set the plants ten or twelve inches apart; and when the side branches appear, pinch off all but three or four, and pinch out the centre shoot. For conservatory or out-door planting, producing their gorgeous masses of brilliant-colored flowers in the greatest profusion. When grown in pots, and large specimens are desired, they should be shifted into ten or twelve-inch pots, using the richest and freest compost, and liberally supplying with manure-water. Tender annuals. BALSAMS, CAMELLIA-FLOWERED. A most beautiful variety; blotched or spotted with white; very double colors, mixed. 2 feet "DOUBLE DWARF. Very double mixed. 1 foot "IMPROVED ROSE-FLOWERED. Finely imbricated; flowers, two inches in diameter; superb; mixed. 2 feet "ROSE-SPOTTED. Very fine variety; mixed. 2 feet "CARNATION STRIPED DWARF ROSE. Magnificent; mixed colors "SOLFERINO. Striped and streaked with lilac and scarlet on satin-white ground; most beautiful; mixed. "ATROSANGUINEA PLENISSIMA. Deep blood-red; splendid." NEW VICTORIA. Satin-white; punctated and spotted with cinnabar scarlet "Extra fine mixed.	.15 .15 .15 .15 .15
BARTONIA. NAT. ORD., Loasacea.	
A very showy half-hardy annual, with gray branches and thistle-like leaves flowers, very brilliant yellow; will not bear transplanting very well; sow the seed where it is to bloom, thinning the plants out about six or eight inches apart.	3
BARTONIA AUREA	.05
BRACHYCOME. NAT. ORD., Composita.	
A beautiful free-flowering dwarf-growing plant covered, during the greater portion of the summer, with a profusion of pretty, cineraria-like flowers; very effective in edgings, small beds, or pot culture; succeeding in any light, rich soil. Half-hardy annuals BRACHYCOME IBERIDIFOLIA (Swan-River Daisy). Blue	7 1
BROWALLIA. NAT. ORD., Scrophulariacea.	

Very handsome, profuse-blooming plants; covered with rich, strikingly beautiful flowers during the summer and autumn months; growing freely in any rich

CALLIRHOE. NAT. ORD., Malvaceæ.	
An elegant tribe of plants, strongly resembling the scarlet Linum; height, from two to three feet; commences to bloom when about six inches high, and presents a mass of flowers during the entire summer; makes a splendid bedding plant, if sown thick. Hardy annuals.	
CALLIRHOE INVOLUCRATA. A trailing plant of great beauty. The	
flowers vary in color from bright rose to the deepest crimson.	τ
In size and color resemble the Portulaca. "PEDATA. Color, rich violet purple, with white eye. 2 feet	.10
" NANA. A dwarf variety, growing about one foot	5
high; a very profuse bloomer	.05

CAMPANULA. NAT. ORD., Campanulacea.	r Pkt.
Exceedingly beautiful flowers, all of which are characterized by the richness of their colors and the profusion of their bloom. The dwarf varieties are the most valuable for bedding plants; while the whole genus is worthy of a prominent place in every garden. For other varieties, see Perennials. CAMPANULA LOREII. Purple lilac; extremely showy; hardy annual.	e - (
foot	.05 y .05
" Fine, mixed	.05
CANDYTUFT (IBERIS). NAT. ORD., Crucifera.	
One of the most useful border annuals, growing about one foot in height very effective in beds, groups, ribbons, etc.; also very useful for pot culture, fo conservatory decoration during winter. Hardy annuals. IBERIS ODORATA (Fragrant Candytuft). Pure white; fine. "UMBELLATA. Purple. "DUNNETTII. Dark crimson; very beautiful. "CORONARIA (Rocket). Pure white. "ROSE. "Fine, mixed.	.05 .05 .05
CANNA (INDIAN SHOT). NAT. ORD., Marantacea:	
This stately species of plants is highly ornamental in flower gardens, producing a rich and oriental effect by their large, broad, massive foliage, and ric crimson and scarlet flowers. Though perennial, if sown early, they will mak luxuriant growth, and bloom the first season. In late autumn, they should be carefully potted, and allowed to mature their bloom in the greenhouse or parlou and afterwards preserved in a cool, dry cellar. In spring, again start them int growth, and replant them in the open air, last of May or first of June. Befor sowing, soak the seed in water at 125°, for about 12 hours. CANNA NIGRACANS. This variety excels, in the rich tints of its stem and leaves, reminding us of the rich coloring of some of the Dracena and Marantas. Its growth is rapid, its aspect stately,—entirel unique and distinct from any others. "INDICA RUBRA. Red. 2 feet. "WARSZEWICZII. Brilliant red; foliage striped new. 3 feet "COMPACTA ELEGANTISSIMA. Large; reddish yellow; fre flowering. 2 feet. "SELLOWII. Scarlet; profuse blooming; very fine "NEPALENSIG. Superb yellow flowers. "Mixed varieties.	1
CATCHFLY (SILENE). NAT. ORD., Caryophyllaceæ.	
A showy, free - flowering plant for beds, borders, or ribbons; succeeds in an garden soil. About eighteen inches high. Hardy annuals. CATCHFLY LOBELS. Red, white, or rose; separate or mixed	
CELOSIA. NAT. ORD., Amarantacea.	
Magnificent, free-flowering, graceful-growing plants; producing, in the greatest profusion, spikes of the most beautiful feathery-looking flowers. C. argentee however, produces its flowers in spikes, like a Gomphrena, but much longer and if gathered when young, they are valuable for winter bouquets. Plant of in June in a warm, sheltered situation; grown in pots, they are the most elegant of greenhouse, conservatory, or window plants, where they may be had in flower the whole winter; grow freely in rich, loamy soil; half hardy annuals.	r, ; it it

	SUNFLOWER. NAT. ORD., Composita.	
SUNFLOWER.	NEW MAMMOTH RUSSIAN. A very valuable plant is the Mammoth Sunflower. From 100 pounds of seed 40 pounds of oil has been produced. Very useful for burning or domestic purposes; after the oil is extracted, the residuum of the seeds can be pressed into oil-cake, and made available for fattening hogs. In India it has been used, and very successfully, as a substitute for coffee. In this country it is very useful, if sown in quantities in swampy districts, freeing the atmosphere from the animal and vegetable germ supposed to contain the miasma so productive of Fever and Ague. It is not particular to soil; it can be sown broadcast, or in drills as Indian corn. Apart from the above useful purposes, it is an excellent food for poultry. To bring it into more general cultivation, I offer it at a very low price for the quantities named: Per fb., 50c; per oz., 10c; 10 fbs., \$4.50.	
	TAGETES. NAT. ORD., Compositæ,

(See page 59°)

VEGETABLE SEEDS.

IT IS USELESS TO EXPECT GOOD CROPS FROM BAD CULTURE OR A BARREN SOIL,

I have every facility for proving the stocks from which my seed is saved. I grow samples of every variety, and am thus able to judge of my own personal knowledge of the best varieties. I recommend the trial of new varieties offered by *reliable parties*. They will not always in every locality prove a success. Still, try them. The seed now offered, I send out with every confidence of its giving satisfaction.

No half packets, under any circumstances, are put up, or half ounces where the rates per ounce are less than one dollar.

ARTICHOKE (CYNARA SCOSYMUS). German, Artischoke.

The artichoke is propagated by seeds, or suckers from established plants. If by slips, early in spring. Sow the seeds in April, in a bed of good, rich earth, in drills one inch deep and twelve inches apart, transplant the following spring to a permanent place, either in beds or drills. Plant two feet apart each way.

ASPARAGUS (ASPARAGUS OFFICINALIS). German, Spargel.

Sow the seed in the fall or early in the spring, one inch deep and one inch apart, in rows one foot apart. When one year old, transplant into permanent beds, the plants placed a foot apart in the row, and two feet from row to row, and at least two inches beneath the surface.

ENGLISH BEAN (FABA VULGARIS). German, Gartenbohne.

Sow as early as the ground will admit, in rows two feet apart, and three inches apart in the rows. They will increase their production if the tops of the plants are pinched off as soon as in bloom. These beans are not much grown by Americans; by the European population they are much esteemed. Succeed best in a deep, strong, loamy soil.

	Per Qt.	
EARLY MAZAGAN. One of the hardiest.		
LONG-PODDED. Later than the Mazagan.	3 feet. Per pkt. 1035	
BROAD WINDSOR. Extensively cultivated	l. 2 feet. Per pkt. 1035	
GREEN WINDSOR. Retain a fresh, green	color. 3 feet. Per pkt. 1035	

BEANS. DWARF or BUSH (PHASEOLUS VULGARIS). German, Bohne.

Drop the beans three inches apart, in rows two and a half feet apart; hoe often, never when the vines are wet, or they will rust. All varieties of beans are sensitive to frost and cold, and should not be planted before the middle of spring. As they require but about six weeks to make green pods, they can all be sown as late as August.

O CONTRACTOR OF THE CONTRACTOR	
EARLY YELLOW SIX WEEKS. Excellent for string or shell; one of the

WHITE-RUNNER. The flowers pure white. Per pkt. 10	.50
PAINTED LADY. Variegated flowers; the upper petals being scarlet, the	
lower white. Per pkt. 10	.60

BEET (BETA VULGARIS). German, Nunklerube.

Sow the seed in April, as soon as the soil can be worked. For use in autumn, the seed should be sown about the middle of May; and for the winter supply, about the middle of June or first of July. Spade or fork the soil deeply and thoroughly over; and draw the drills across the bed fourteen inches apart, and about an inch and a half in depth. Sow the seed thick enough to secure a plant for every two or three inches; and cover the depth of the drills. The early plants may be thinned out and used as Spinach, leaving the main crop five or six inches apart. The after-culture consists in keeping the earth in the spaces between the rows, loose and open, by frequent hoeing.

P	rice.
EARLY BASSANO. Earlier than Turnip Blood. Flesh, white, circled or	TC
zoned with bright pink; very tender. Per pkt. 5	.10
deep blood-red; sweet and tender. Per pkt. 5	.io
EGYPTIAN TURNIP-ROOTED BEET. Its merit consists in its great ear- liness, being equal to the Bassano, but having the advantage over that	
variety in having small and upright leaves, allowing it to be grown nearly	
twice as close together. In color it is a rich, deep crimson, the color	
most valued in beet. Per pkt. 10 LONG SMOOTH DARK BLOOD. An improved variety of the common	.20

CABBAGE (BRASSICA OLERACEA CAPITATA). German, Kop fkohl. Per Oz. These varieties need no recommendation; they are all well proved. For early use, sow in hot-beds in February or March; and for winter, in the open ground in May or June. When five or six inches high, transplant twelve to thirty inches apart. The ground must be rich, or made so by a good coat of manure. Digging or plowing deep is very essential. KEMP'S INCOMPARABLE. Very superior, early; compact. Per pkt. 10_ EARLY WYMAN. It grows double the size of the Early Wakefield .. hich it succeeds; and is the earliest large cabbage. Per pkt. 10 YORK. One of the most popular cultivated. Per pkt. 5 ------.20 EARLY WAKEFIELD. American seed; similar in form to the Early York; nearly as early; good size; a favorite with market-gardeners. Per pkt. 15_ WAKEFIELD (English). Per pkt. 10 ... LARGE YORK. The head is broad, firm and solid; a favorite at the South, and bears the heat well. Per pkt. 5 .20 LATE DRUMHEAD. American seed; heads very large, close and firm; very hardy. Per pkt. 10. MARBLEHEAD MAMMOTH DRUMHEAD. Very solid, sweet and tender; most profitable cabbage for market. Per pkt. 10____ .40 FRENCH OXHEART. Taking the place of many others, as it comes in after the Early York. Per pkt. 10 LITTLE PIXIE. A small, delicate-flavored variety; one of the earliest and .40 .40 RED DUTCH, OR PICKLING. Used for pickling; medium size, oblong shape, and very solid; of a deep red color. Per pkt. 5 ROBINSON'S CHAMPION PRIZE OX. Very large, flat and solid; speci-.20 mens were exhibited weighing eighty pounds. Per pkt. 5-----.20 WINNIGSTADT. Similar to the Oxheart; conical; heads full and solid; an intermediate variety; one of the best. Per pkt. 10_____ .40 CAULIFLOWER (Brassica Oleracea Botrytis). German, Blumenkohl. The most delicious of the cabbage tribe. The season for sowing, for the early spring or summer crop, is between the 8th and 20th of September; and for the autumn crop, about the first of April. The plants, as soon as they are two or three inches high, should be planted out in a bed of light, rich soil, three inches apart each way, to grow firm and stocky, to remove to their final place of growth. Lift the plants, with a trowel, from where they were transplanted, and plant eighteen inches apart each way. The frame should be surrounded with straw or litter of some kind, also the glass or shutter should be covered with mats or dry straw in severe weather, observing to give plenty of air on mild and pleasant days, to prevent the plants from drawing. For a late autumn crop they require no particular care or skill, simply keeping them free from weeds, and the ground stirred frequently. To prevent the flower from scorching, break a few of the inner leaves, and fold over. ERFURT, EARLIEST DWARF. The best in cultivation for early forcing and open ground; very dwarf; leaves small, heads large and very firm; pure white. Per pkt. 25; per half oz. \$1.50. 2.50 HALF-EARLY PARIS. Heads rather large, white, and compact; leaves large, stalk short; very early; plant in spring. Per pkt. 25 2.00 EARLY LONDON. Well known for general use. Per pkt. 10 1.00

CORN (ZEA MAY). German, Welschcorn.	Per Qt. Price.							
The following varieties will be found all that is necessary for a supply durin the season:								
EARLY CONCORD. The stalks are strong, stocky, and vigorous, growin seven to seven and a half feet; producing two or three ears on a stalk ears sit rather low, and having from twelve to sixteen usually, and occasionally twenty, rows on the ear; color, when fit for the table, very whit and handsome; quality superior, not surpassed by any other variety; size of ears large, considerably larger than the Crosby; and superior to an other, either for the market or family use. Per pkt. 10; per pint, 25EARLY MINNESOTA. Very early, good; rather dwarf. Per pkt. 10DARLING'S EXTRA EARLY SUGAR. Early, tender and sugary; yield well, produces little fodder. Per pkt. 10CROSBY'S, OR BOSTON MARKET. Twelve-rowed, the earliest of the large varieties; the best in cultivation. Per pkt. 10STOWELL'S EVERGREEN. Very tender and sugary; very reliable for late crop; sow about the first of July. Per pkt. 10NONPAREIL, OR POP-CORN. A fine parching variety. Per pkt. 10	:;;;a :e :e :y5040 e40 a .40							
CRESS, OR PEPPERGRASS (LEPIDIUM SATIVUM). German, Kresse.								
Sow rather thick, in shallow drills, and at short intervals during the seasor. The Water-cress requires to be grown on the edge of a running stream or brook where it does not freeze too hard during the winter. The leaves, while young have a warm, pungent taste; and are eaten as salad, either separately, or mixed with Lettuce or other salad plants.	k, g,							
CURLED. A well-known variety for salads. Per pkt. 5	Per Oz.							
AUSTRALIAN OR GOLDEN. Fine piquant flavor. Per pkt. 5								
WATER. An aquatic plant, with small, oval leaves and prostrate habit; leaver are used as an early spring salad. Per pkt. 10								
CORN SALAD, or FETTICUS (VELERIAN LOCUSTA).								
German, Lammersalat.								
An annual plant cultivated for its tender leaves; esteemed as a winter early-spring salad. The seed is sown in shallow drills, early in Septembe On approach of winter, cover the plants lightly with straw. Per pkt. 5	r.							
CUCUMBER (CUCUMIS SATIVUS). German, Gurke.								
Culture in the open air is of the simplest character. Dig a hole about eighteen inches wide and one foot deep; fill it three-fourths full of decompose manure; raise it above the surface about six inches. The hills should be so that the sach ways. Any time in May some four each the six in the sach ways.	ed ix							

Culture in the open air is of the simplest character. Dig a hole about eighteen inches wide and one foot deep; fill it three-fourths full of decomposed manure; raise it above the surface about six inches. The hills should be six feet apart each way. Any time in May sow a few seeds therein; cover half an inch deep, and press the earth smoothly over. Frequently a little bug preys upon the tender leaves; soot and wood ashes sprinkled over them, while wet with the dew, will retard the progress of the depredator. When all danger from bugs and worms is past, thin out, leaving but three or four of the strongest plants on each hill. That the amateur cultivator may have them early for family use, prepare a frame, following the instructions laid down for hot-beds. In two or three days the earth will be sufficiently warm for sowing the seeds. If the plants are to be removed into other frames, sow them in pots; if not, sow them a hill made in the centre of the bed. Cover the sash at night with straw, mats, or any similar protection and surround the bed with litter or boards, to protect it from the piercing winds. During their growth, admit air every day at the back of the frame, giving as much light as possible to the young plants. Give them water in the forenoon, which has been kept in the bed during the night that it may be in a warm state. The requisite temperature of the bed at night, from 65° to 75°; day, 75° to 100°.

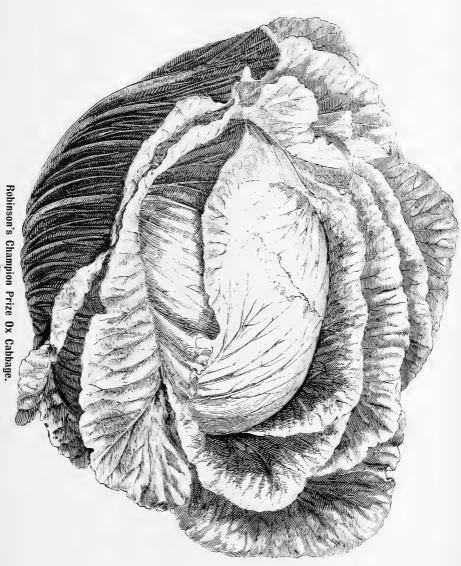

EARLY RUSSIAN. Fruit from three to four inches long, produced in pairs.

Flesh tender, crisp, and well-flavored. Per pkt. 5

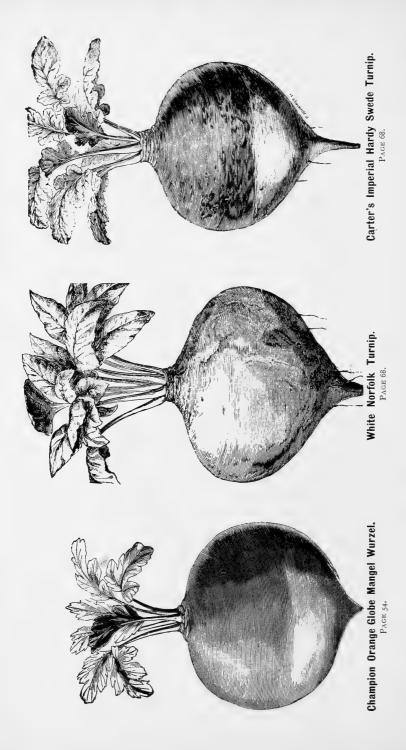

CUCUMBER—CONTINUED. Per Oz. Price.
EARLY CLUSTER. Fruit in clusters near the root. Skin, prickly; flesh white, seedy, tender, well-flavored. Per pkt. 5
ENGLISH FRAME CUCUMBERS.

KOHL-RABI, or TURNIP-ROOTED CABBAGE. German, Kohl-rabinber.

The Kohl-Rabi is a vegetable intermediate between the Cabbage and the Turnip. The stem, just above the surface of the ground, swells into a round, fleshy bulb, in form not unlike a turnip; on the top, and about the surface of this bulb, are put forth its leaves, which are similar to those of the Swedish Turnip. The part used is the turnip-looking bulb formed by the swelling of the stem. When young, the flesh is tender and delicate, possessing the combined flavor of the Cabbage and Turnip. Cultivate as Cabbage; only, in earthing up the plant, be careful not to cover the globular part. They should not be used before they have attained their full growth.

LETTUCE (LACTUCE SATIVA). German, Lattich.	
The Lettuce is divided into two classes, viz.: the Cabbage Lettuces and Co-Lettuces. The Cabbage have round heads and broad-spreading leaves; the Cos varieties have long heads and upright, oblong leaves. A very rich soil in necessary to produce fine Lettuce. Its crisp and tender quality depends on a luxuriant and vigorous growth. The earliest sowing may be made in Februar or March, under glass, with slight heat. Keep the plants thin, and admit plenty of air to the frame every fine day. For later supplies, sow in the open ground as soon as the season will permit; transplant or thin out the plant gradually to a foot apart, and keep well cultivated. The Cos Lettuces are excellent, if grown early in the spring, but run to seed quickly in hot weather The large cabbage kinds are the best, and most suitable for summer crops.	e s s a y t t n s - · · ·

NEW GIANT ROCCA ONION.

OF NAPLES.

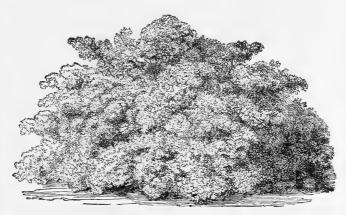

(See page 56.)

OKRA, OR GUMBQ (HIBISCUS ESCULENTUS).

	r Oz.
The seeds are sown thinly, on dry, warm soil, in shallow drills, two feet apart. Cover the seeds lightly. After the plants are up, thin them out to nine inches apart; hoe freely, and draw a little earth to the stems as they continue to grow. Gather the pods when quite green, and about an inch and a half long. The green seed-pods are used in soups, and deemed a luxury.	rice.
LONG GREEN. Pods long and ribbed. Per pkt. 5	.10
ONION (ALLIUM CEPA). German, Zwiebel.	
The soil in general can not be too rich; it requires more or less manure for every crop. Previous to sowing, the ground should be thoroughly spaded over, or deeply plowed, and the surface made smooth and even. The seed should be sown early in spring, in drills fourteen inches apart and half an inch in depth. When the plants are three or four inches high, thin them out to two inches apart. If the weather is moist the thinning may be transplanted. To grow onions for pickling, sow the seed thinly in March or April. No further culture is required, except hand-weeding, as their thickness in the bed will prevent their growing large, and will cause them to come to maturity	
sooner.	
EARLY RED. Close-grained, mild, and a good keeper. Per pkt. 5c LARGE RED WETHERSFIELD. Large-sized; skin deep purplish-red; flesh, purplish white; fine grained; very productive, and one of the best	.25
to keep. Per pkt. 5. DANVERS YELLOW. Skin, yellowish brown; flesh white, well-flavored;	.20

CHAMPION MOSS-CURLED PARSLEY.

PARSNIP (PASTINACA SATIVA). German, Pastinake.

Succeeds well in a rich, sandy loam; manured the year previous is best. Sow early in the spring, in drills fifteen inches apart and one inch deep; scatter the seeds thinly, and cover evenly. After the appearance of the seed the soil must be stirred with the hoe frequently, until the leaves cover the ground. Every one having a garden or field should grow them; if not wanted for table use, your cattle would be grateful for them. They will stand any severity of frost.

PEAS (PISUM SATIVUM). German, Erbse.

The planting for an early crop of garden Peas should be made in the spring, as soon as the ground can be worked, in a warm, dry situation, and covered about three inches in heavy soils, and five to six inches in light soil. At the South, where they will endure the winter, the planting for the first crop is made in October and November. The ground should be manured the year previous, or the peas are apt to grow too much to straw. They are usually planted from three to four feet apart. The large and later sorts do better at a greater distance, leaving a broad space for planting low-growing vegetables between. For a late crop, sow the last of July with the early varieties, and they will come into bearing before the early frosts. They should be kept clean, and earthed up in their growth. From one to two bushels are generally required to an acre. One quart of the smaller sorts will sow about one hundred and twenty feet, and of the larger sorts about two hundred feet, of drill.

Free by mail at these prices,

THE COOK'S FAVORITE PEA.

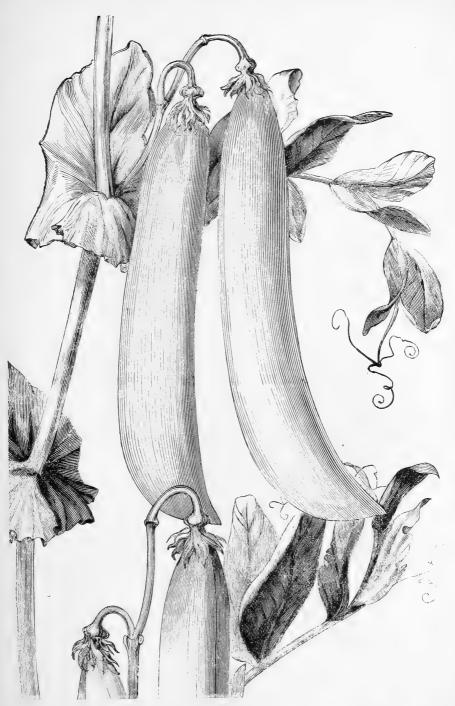

(See page 59.)

NEW PEAS. Per Pkt. I can only give the raisers descriptions of the following new varieties. I have imported a limited quantity for trial here, and can only offer them in packets. LAXTONS "QUANTITY." A richly-flavored, second early wrinkled marrow, selected from Laxton's Quality for its robust habit and extreme productiveness; it also differs in the shape of its fine long pods. Laxton's Quality and Laxton's Quantity are two varieties of good constitution, very much superior in flavor and productiveness to the second early or main crop wrinkled Peas, such as Eugenie and Champion of England Peas, and we have no doubt will, as they become known, supersede these varieties in public favor from their handsome pods. Per pkt. LAXTON'S OUALITY PEA. A second early wrinkled Pea of great productiveness and fine flavor; is a great improvement on all the second early wrinkled Peas at present in cultivation. The two sorts we now offer (Quality and Quantity,) combine all the necessary requisites of useful, fine-flavored garden Peas. Per pkt. ____ "BLUE PETER." Blue Peter is a remarkably dwarf variety not over 6 inches high, dark green foliage, a splendid bearer, and of exquisite flavor, with large, well filled pods—a decided improvement on Little Gem. Per pkt.__ KENTISH INVICTA is a round blue Pea, about "two feet" in height, with straight, handsome, well-filled pods; is earlier than the best stocks of Daniel O'Rourke, whilst the fact of its being a "Blue" Pea proclaims it to be infinitely superior in flavor to any white variety in cultivation. Per THE EARLIEST ROUND-SEEDED PEAS. CARTER'S FIRST CROP, OR SUTTON'S RINGLEADER. It is the .50 SECOND EARLY ROUND-SEEDED PEAS. BISHOP'S NEW LONG - PODDED. Good quality, early and prolific. 2 feet. Per pkt. 10. .50 BLUE SURPRISE, CARTER'S. Fine flavored, and a good cropper. 4 feet. THE COOK'S FAVORITE, NEW. Slightly curved, remarkably fine pods; PRINCESS ROYAL. Productive, with long, well-filled pods. 11/2 feet. Per LAXTON'S EARLY PROLIFIC LONG POD. For a second early Pea, there is no Pea of a similar class in cultivation to equal it. Very prolific. 4 feet. Per pkt. 15 -BURBIDGE'S ECLIPSE. Dwarf, blue variety; good cropper and most excellent flavor. 2 feet. Per pkt. 10 FLACK'S VICTORY. Blue. Productive; fine. 3 feet. Per pkt. 10 .50 WATERLOO MARROW. Large pods, fine flavor, and very productive. 6 feet. Per pkt. 10 .40 DWARF WATERLOO. A valuable dwarf Pea for general and late cropping; of rich marrow flavor, and very productive. 15 inches. Per pkt. 15 ---ALPHA, NEW. This Pea, introduced in the spring of 1870, has fully justified the high opinion formed of it. Laxton's Alpha must, for its obvious good qualities, be set down as a decided acquisition to our first early Peas. Though growing from 21/2 to 3 feet in an almost unexampled dry season, it yet turned in only three days later than First Crop or Ringleader. This season the pods were fit to gather some four days before those of Daniel O'Rourke; no doubt it is fully as early as that variety,

with the advantage of possessing a higher quality. Per pkt. 25 _____ 1.50

(See page 60.)

	Oz.
Are generally raised on cultivated farms, between hills of Indian Corn, and may be planted with success in fields by themselves. CHEESE, MEDIUM-SIZED. One of the best varieties for field culture. Per lb. \$1.00; per pkt. 5 LARGE YELLOW. Finest family Pumpkin. Grows to a large size; fruit ribbed. Per pkt. 5; per lb. 50	.10
RADISH (RHAPHANUS SATIVUS). German, Rettig Radies.	
For early crops, sow in spring, as soon as the ground can be worked, in light, rich soil; for later crops a deep moist soil is preferable. Sow the seed thinly, in beds or drills, covering them with about a quarter of an inch of fine earth. The plants should be frequently watered in dry weather. For early use, sow in gentle hot-beds. The great aim in raising Radishes is to grow them quick; if not successful in this point, they are tough and worthless. A trite saying amongst gardeners: a man that can grow Radishes can grow any other crop. The Black Spanish and China varieties may be sown in the fall with Turnips; it is said to improve their flavor, and saves the Turnip from the Black Aphis. COVENT GARDEN LONG SCARLET SHORT TOP. The earliest and finest variety grown. Per pkt. 5. WOOD'S EARLY FRAME. Scarlet; tender; fine for hot-beds, frame and open ground. Per pkt. 5. SCARLET TURNIP. Rich color, crisp and tender. Per pkt. 5. WHITE TURNIP. Flesh white and semi-transparent. Per pkt. 5. SCARLET OLIVE-SHAPED. Skin fine scarlet; flesh rose colored, tender, excellent; well adapted for forcing. Per pkt. 5. LONG WHITE NAPLES. A beautiful, long, clear, white Radish, tinged with green at the top; excellent. Per pkt. 5. BLACK SPANISH. Excellent; large, black; winter sort. Per pkt. 5. ROSE-COLORED CHINA WINTER. Fine, of a bright rose-color; flesh firm. Per pkt. 10. FRENCH BREAKFAST. Oval form; color scarlet, tipped with white; fine flavor. Per pkt. 5. RHUBARB (RHEUM HYBRIDUM). German, Rhubarber.	.10 .10 .10 .15 .10
the deeper it is, the better. Sow in drills an inch deep. Thin out to six inches apart. In the fall trench a piece of ground and manure it well; transplant the young plants three feet apart each way. Cover with leaves or litter the first winter, and give a dressing of manure every fall. To procure an immediate crop, plant roots which are already grown.	
VICTORIA. A large variety; the best for general use. Per pkt. 5	.25 .25
SALSIFY, OR OYSTER PLANT (TRAGOPOGON PORRIFOLIUS).	
German, Bocksbart,	
Sow the seed in drills, half an inch deep, and ten inches apart, early in the spring, giving them the general culture of carrots. They are perfectly hardy, and may remain out all winter. Store a quantity for winter use, packed in earth or sand. When cooked, the flavor resembles the oyster, and is a good substitute for it.	
SALSIFY, OR OYSTER PLANT. Per pkt. 10	.20
SAVOY.	
Should be sown early, and when the plants are six inches high, transplant out, to three feet apart. The Savoys have more of the richness of the Cauliflower than the Cabbage. DRUMHEAD SAVOY. Head, large, round, compact; yellowish at the centre; excellent for winter. Per pkt. 5	

	r Oz.
GREEN GLOBE, OR CURLED SAVOY. Medium size; does not make as firm a head as some; very tender. Per pkt. 5	.20 .25
SEA-KALE (CRAMBE MARITIMA). German, Selkohl Meerkohl.	
A most delicious vegetable, is not grown so much as it should be. Sow in April, in drills an inch and a half deep, and sixteen inches asunder, the soil well enriched and thoroughly trenched. Let the plants remain till the following spring, then transplant them in rows three feet apart, and eighteen inches apart in the rows. Late in the fall, cover the crowns of the plants with earth, making a ridge over the rows about a foot and a half high. For small gardens, plant the roots in a triangle, placing over them a barrel sawn in two, well covered with manure. This will enable you to have a very early supply. After the cutting is over in the spring, level the earth into trenches, adding a good coat of strong manure.	
SEA-KALE. Per pkt. 10.	.30
SPINACH (SPINACIA OLERACEA). German, Spinat.	
Spinach is best when grown in rich soil. Sow early in March for summer crop, in drills, which renders the cultivation more convenient. For a succession, summer varieties may be sown, at intervals of a fortnight, from April to August. Sow from the middle of August to the beginning of September for the winter crop, in light sandy soil. Thin the plants as soon as they are strong enough, leaving them about nine inches apart in the row. May be sown as an edging along the sides of the garden-walk. Two ounces of seed will plant five drills, each forty feet long,	
ROUND, OR SUMMER. Grown for summer use. Per pkt. 5.—FALL, OR PRICKLY. The hardiest, used for fall planting. Per pkt. 5.—NEW ZEALAND. A large-growing variety, requiring a warm, rich soil. It grows luxuriantly, in the hottest weather. Per pkt. 10.———————————————————————————————————	.10 .10
SQUASH (CUCURBIT MELO PEPO). German, Kurbiss.	
They only thrive well in a warm temperature; and the seed should not be sown in spring until all danger from frost is past. Keep the earth about the plants loose and clean, removing the surplus vines, allowing not more than three plants to a hill. They require the same culture as directed for cucumbers and melons.	
YELLOW BUSH SCOLLOPED. An early, flat, scolloped-shaped sort; color, yellow; flesh pale yellow, tolerably fine-grained, and well flavored; very productive. Per pkt. 5.— WHITE BUSH SCOLLOPED. Sub-variety of Yellow Bush. Per pkt. 5.—	.15
SUMMER BUSH CROOKNECK. One of the finest of the summer varieties; color, bright yellow; skin very warty, and easily broken; flesh, dry	.10
and well flavored. Per pkt. 5 BOSTON MARROW. Flesh very dry, fine grained; for sweetness and excel-	.15
lence unsurpassed; in use from August till March. Per pkt. 5————————————————————————————————————	.15 .20
TURBAN SQUASH. Improved. Flesh, orange-yellow, thick, fine-grained, sugary, best for fall or early winter use. Per pkt. 10 FALL OR WINTER CROOKNECK. Flesh, salmon-red, very close-grained,	.35
dry, sweet, and fine flavored; keeps well. Per pkt. 5	.15
MOORE'S VEGETABLE CREAM. A variety of the Vegetable Marrow, and recommended as a valuable acquisition. Per pkt. 15	.50
CUSTARD. Skin or shell, creamy white: flesh, pale yellow; one of the hardiest and most productive. Per pkt. 15.	
MAMMOTH. This is the largest variety known; and in rich soil, often grows to the weight of a hundred to a hundred and forty pounds. Per pkt. 10.	.50

McLEAN'S EPICUREAN.
(See-page 60.)

DWARF WATERLOO PEA. (See page 59.)

STRAWBERRY SEED.

Per Oz. Price.

Saved from a large collection, embracing all the best European and American kinds in cultivation. Mixed seed. Per pkt. 25.

TOMATO (SOLANUM LYCOPERSICUM). German, Liebesapfel.

Sow in a hot-bed in March or April, or in pots in a warm window. They should be started as early as possible, whether by hot-bed or open-air culture. When two inches high, transplant, in single plants, to warm, light, rich soil. Water freely at the time of transplanting. Shelter from the sun for a few days. If sown in the open ground, select a sheltered situation, pulverize the soil finely, and sow in drills. This may be done about the first week in April or up to May. Transplant to where they are to remain, as before directed.

- "GENERAL GRANT." Form round, very regular, seldom wrinkled; color, brilliant crimson; flesh, firm and solid, and ripening well up to the stem. Per pkt. 5
- BOSTON MARKET. A variety extensively cultivated for the Boston Market, by market-growers, for its earliness, size, and good qualities, and is esteemed one of the best and most profitable varieties in cultivation. Per pkt. 5.
- RED CURRANT. The fruits grow in long drooping racemes of a bright red color of from fifteen to twenty-five, disposed in two rows, giving them a strong resemblance to clusters of red currants. Per pkt. 10
- CHERRY. Red and Yellow. A small variety, growing in clusters; fine for preserving. Per pkt. 5.

 FEEJEE. Fruit large, bright-red, sometimes ribbed, and well filled to the centre. Per pkt. 5.

 35

- LESTER'S PERFECTED. Regular; large; firm, well-flavored. Per pkt. 5 .35
 PEAR-SHAPED SCARLET. A striking variety; the fruit about the size of a
 plum. Per pkt. 10.
- RED AND YELLOW PLUM. Hardy, productive; used for preserving and pickles. Per pkt. 5.

 STRAWBERRY OR GROUND CHERRY. This, though called a Tomato,
- is a distinct species; excellent for preserves. Per pkt. 10______
 TROPHY. The largest, smoothest, most fleshy, heaviest, and best flavored of all varieties. Very early. Per pkt. 10______

TURNIP (BRASSICA RAPA). German, Steckrube.

Sow as early as the ground will allow, in drills fourteen inches apart and half an inch in depth. The young plants should be thinned to six inches apart. The sowing for the winter supply is made in July or August. Sowing a few radishes with the turnips has proved very successful, saving them from the ravages of the fly. I would impress upon my agricultural friends the importance of a more extended cultivation of the Ruta Bagas, as winter feed for cattle, sheep, etc. For this purpose, sow from the tenth to the twentieth of June, one pound to the acre, in drills 18 to 24 inches apart - from row to row - thinning them out to 12 or 15 inches in the row. Though comparatively very hardy, few varieties will survive the winters of the Northern States, in the open ground. The best way to preserve them for winter use, is to dig a trench 18 inches deep on a dry, welldrained situation, placing them in layers, so that they do not touch, then cover them with soil, placing layer after layer, banking them up with a foot of soil. Thatch the top with straw to keep off the rain, open one end on dry, sunny days, and take out a sufficient supply for your stock. By this method of storing they will keep till April.

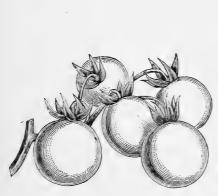

BUNNEY'S INCOMPARABLE PEAR-SHAPED TOMATO. LETTUCE.

(See page 53.)

(See page 66.)

YELLOW CHERRY TOMATO. RED CURRANT TOMATO.

(See page 66.)

(See page 66.)

Per oz. 10c75 Varieties below, though not so hardy as the Ruta Baga, are much cultivated in England for the winter-feed of stock; they can be sown later and come off earlier than the Swedes or Ruta-Baga. WHITE NORFOLK. Grows to a large size: flesh white and coarse-grained.
but sweet. Per pkt. 5. Per oz. Io. 1.00 LONG WHITE TANKARD. Field variety. Per pkt. 5. Per oz. Ioc. 1.00 RED-TOP TANKARD. Like above, except color. Per pkt. 5; oz. Ioc. 1.00 SWEET GERMAN, or WHITE FRENCH. One of the best for table or feeding stock; flesh firm, white, crisp, sweet, excellent flavor; none better for keeping. Sow in June. Per pkt. 5. Per oz. Ioc. 1.00
SWEET, or POT HERBS.
The generality of Sweet Herbs may be raised from seed sown early in spring, and as the herbs come into flower, cut them on a dry day, and spread them in a shady place to dry for use. They are an indispensable requisite in every household, and should be cultivated in every garden. Borage is very ornamental and showy, flower, a beautiful blue color; should be grown largely where Bees are
kept. Per pkt. 5 cents. Those marked with a * are perennial, and when once cultivated in the gar-
den may be preserved for years. Per oz. Per oz.

NOTHING IS MORE ORNAMENTAL THAN A WELL-KEPT LAWN.

Do not suppose, because the weeds appear first, they were sown with the Lawn Grass; these would grow if no seed was sown. The earth is the natural mother of weeds. The finer varieties comprising this mixture are all hand picked. It does not pay to collect seeds of weeds. For a fine and verdant Lawn it is necessary the mixture should be of many varieties; if confined to one or two, the Lawn would become brown in the summer. I notice, in many Seed Catalogues, it is recommended to cut closely; during the hot summer months do not cut too closely, but so arrange your Lawn Mower that it will leave the grass one or two inches high, and protect the roots from the burning sun.

MIXED LAWN GRASS, per bushel, \$5.50; per peck, \$1.50, delivered to Express or Railroad. The person ordering will pay the freight; per quart, by mail, prepaid, 35 cents.

ALSIKE CLOVER.

Copied from the Prairie Farmer, April 17, 1871.

EXPERIENCE WITH ALSIKE.—I have a piece of Alsike, sown three years ago, side by side with the large English red clover. It was sown the same spring. It does not winter kill like the red clover. The crop has been fully equal to the English and common red clovers. The stools are enormous. Hogs, horses and cattle, give it the preference, and will forage upon it all the time to the neglect of all the other kinds. It makes the prettiest bee pasturage in the world, and the sweetest hay. I have no seed whatever to sell, but shall sow more this spring.—W. G. C., Albia, Iowa.

A good plant, valuable for permanent pasture; very hardy, will thrive in any soil, affording a great quantity of nutritious herbage for years to come. Per lb., 60 cents.

LUCERNE.

This, although not generally grown, will, I am convinced, become more so. Soil and situation being favorable, it is a very heavy cropper, and will bear cutting four or five times a year. Per ib., 60 cents.

SUMMER FLOWERING BULBS,

FOR SPRING PLANTING.

It is not safe to send Bulbs during cold, severe weather. They will be forwarded as soon as weather will permit.

ANEMONE.

A most beautiful flower, every year becoming more popular, and when planted in beds or masses with colors of the most brilliant scarlet, red, blue, rose, and striped, the effect is striking. I wish every one who has a garden to grow some of these gems of Flora; even if you fail, the cost is not ruinous. Plant three inches deep, six inches apart. Should you receive something resembling dried pieces of bark, do not be surprised; 'tis the root.

GLADIOLUS.

Persons acquainted only with the old "Sword Lily" Gladiolus can scarcely imagine the improvements recently made upon them. For purity and brilliancy of color, from white to dazzling crimson, combined with soft, rich salmon and velvet shades, the new Hybrid Gladiolus are unrivalled among summer flowering bulbs. A single bulb sometimes produces several stems of bloom, and a succession of flowers for two months. The cultivation is of the simplest description. Plant the bulbs for early bloom the second week in April, following up your planting every two weeks till the second week in June. They delight in rich soil, and should be planted from two to three inches deep, and six to nine inches apart, according to the size of the bulb; to those who purchase by the hundred, and plant in rows, they may be placed two feet or more apart from row to row. But to those whose means are limited, and their desire great, I would advise planting them in their flower-beds singly, growing as they will above scarlet Geranium, Verbenas, and may bedding plants. They not only have a very pretty effect, but you make the most of the small space allotted to you. This beautiful tribe of plants should be planted everywhere. They are easily grown. They are gorgeously beautiful. When cut and placed in water, the flower buds expand and last a long time. Planted by hundreds in the borders among evergreens, or foliage plants, they brighten and be supplied for this purpose. In the fall, when the bloom is over, take up the

LILIES.

ALL HARDY.

Always have been, always will be a favorite. None of the new favorites have displaced the old White Lily of the garden. In June and July it is without a rival. Then in succession follow the beautiful Lilium Lancifolium, Album. Roseum and Rubrum. These occupy an important position, as hardy as our common varieties, exceedingly fragrant, and of easy culture.

A new claimant for public favor is the Lilium Fortunei, a new Japanese lily, of noble aspect, growing six and seven feet high, the lower flower stems running out far and free from the stalk, giving the inflorescence a pyramidal outline. The flowers are a deep, rich scarlet, distinctly spotted with black; a great num-

ber are borne on each stem.

Plant five to six inches deep and allow them to remain in the ground for years. These, unlike the Hyacinth, Crocus, etc., if neglected planting in the fall, may be planted in the spring as soon as the ground is workable.

MADEIRA VINE.

A beautiful climbing plant, its glossy foliage and numerous fragrant white flowers make it a great favorite.

Price, 10 cts. each; \$1.00 per dozen.

RANUNCULUS.

One of the gems of Flora's kingdom too much neglected. For beauty of form and brilliancy of color, it can not be surpassed. No wonder they are not grown more, the wonder almost is they are grown at all. One reason, is the voluminous directions, so bewildering to the non-professional, given for their culture in some of the bulb catalogues. A good friable loam is necessary—if you will, a mixture of decayed cow dung thoroughly incorporated with it—and when planting, let the soil be well trodden down, so that the root will be firmly fixed in the earth to the depth of three inches, and six to nine inches apart. The root, like the Anemone, is not particularly attractive. It is almost surprising so small a root could produce such beautiful flowers. For house and green house culture they are well adapted.

RANUNCULUS.	Finest named varieties	0oz .00
66	" Mixed "	-35

TRITOMA.

The red hot poker plant of Europe, throwing up a spike from three to five feet high; very attractive flowers, red and yellow; admirably adapted for forming large, effective groups and beds. They thrive in any ordinary garden soil, and the early frosts do not effect the bloom. Take up in the fall and protect, as Dahlia roots.

TRITOMA UVARIA	each .35 cts.	3.00
----------------	---------------	------

TIGRIDIAS-TIGER FLOWER.

Mexican bulbs, growing about one and a half feet high, producing flowers of the most exquisite beauty, of singularly curious shape, and the color of each variety gorgeous and purely contrasted. No flower can exceed it in beauty. In bloom from July to October. Plant any time in May or first of June, about two inches deep, in any garden soil. After the tops are killed by frost take up the bulbs and keep them in a dry place until the time of planting in the spring.

DOUBLE TUBEROSES.

The Tuberose is the most fragrant of summer - flowering bulbs, throwing up spikes of double white flowers, two to three feet high, which remain in bloom a long period. When they are needed very early, plant in the green-house or hothed in February or March; and, for a succession of flowers, in April and May. In planting, remove the useless small offsets around the main root, and place a single tuber in a pot four or five inches wide. On the approach of cool weather, in September, those remaining in bloom should be removed to the conservatory or parlor, when they will continue in flower for a long period. The bulb having once flowered, it will not bloom the second time.

Fine bulbs, 15 cents each; \$1.50 per doz.

CLASS 4. ADDITIONAL GREENHOUSE AND BEDDING PLANTS.

CLASS 5. VASE AND BASKET PLANTS,

CLASS 6. VEGETABLE AND MISCELLANEOUS,

FOR SALE AT THE

BLOOMINGTON NURSERY,

ВУ

F. K. PHOENIX,

BLOOMINGTON, McLEAN CO., ILL.

SPRING OF 1872.

OUR MOST GRATEFUL ACKNOWLEDGMENTS — While inviting particular attention to the stock and assortment of splendid Novelties and choice Ornamental Plants generally, set forth in this catalogue.

TWELVE HOUSES, for Plants and Propagating purposes give unusual facilities; so we may truly say our collection is much the largest and best ever offered here—and indeed, for Western purchasers, we doubt is at all equaled.

OUR PLANTS — Are in most splendid health and vigor, of the best size and shape for packing, and put up in the most approved style for safe transit. They are usually sent by Express — for which there are excellent facilities at this point.

EXPRESS CHARGES PREPAID — When cash in full accompanies order, to any real-road point reached by United States or Am. M. U. Express Co., in the States of Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Iowa, and Missouri, as follows: Not over 4 pounds, for 50 cents additional. Not over 8 pounds, for 80 cents additional. The above includes all charges for packing and delivery at express office here. As it is difficult to estimate exact weight before packing, be sure and send enough. Any over-plus will be promptly returned.

By MAIL—Parcels—up to four pounds weight—postage two cents for every four ounces or fraction over. This is a great facility, and ordinarily quite safe, the risk increasing in proportion to the fleshiness or frality of the foliage. Over 20 wagon loads of mail packages sent by us last season, and nearly ever article arrived in good condition. When ordering plants by mail, the purchaser will please be particular and send cash in full to cover the order. When only a part of the amount is remitted, goods will be sent only to the amount of the remittance. We have been compelled to adopt this rule on account of the inconvenience of collecting small balances at the close of the season.

PRICES — Named herein, are mostly for small shipping sizes — larger can often be furnished at corresponding rates. A small charge is made for packing, also for postage on mail parcels. Any ordinary moderate parcel, box or basket 35 cents; larger lots 50 to 75 cents, or more On a dozen Verbenas or similar small plants, 25 cents will cover packing and postage.

TERMS — Net cash here to amount of Bill — with order, or (if not too distant) by Express with Bill "C. O. D." $i.\ e.$, "Collect on Delivery" of goods, with return charges added. After delivering at Express, Post Office, or Depot, our responsibility ceases. Errors and mistakes of ours cheerfully corrected. No order under one dollar will be filled. We shall consider it optional with us either to return the money (minus the postage) or send the amount in flower-seeds.

REMITTANCES — In bank notes by mail at sender's risk, though generally safe. By postal orders, New York or Chicago Exchange, or prepaid by Express are the surest modes.

PURCHASERS' SELECTIONS — Gladly allowed, and the choice new varieties, usually included in sets or dozens, as far as practicable, without extra charge; but at wholesale, as per dozen or hundred, the selection must be ours, to preserve the assortment.

TIME OF PLANTING—From time Spring frosts cease up to June 15th. A most admirable feature of pot grown plants, is the perfect safety and facility of using to advantage up to a very late period, say July 10th, for instance, where new places can not be got ready in the usual Spring season for planting, or where seeds etc., have failed. The only pre-requisite is to choose, if possible, a moist cloudy time for planting out, or use shade and water temporarily till rain comes. For very late planting, the Monthly Roses are best for bloom; next the quick growers and perpetual bloomers, as Ageratum, Zonale and H. P. Geraniums, Lantanas, Petunias, Verbenas, Salvias, Vincas, also the beautiful Achyranthus and Coleus—all good but C. Vershaffelt especially,

CLASS I.

PLANTS OF SPECIAL INTEREST.

Orders for Plants should be sent on a separate sheet from the orders for SEEDS, the departments are entirely separate.

GREEN-HOUSE PLANTS WILL BE SPECIALLY DESIGNATED AS SUCH.

AGERATSM TOM THUMB.

A miniature dwarf variety, forming a low and compact growth. Flowers, light porcelain blue, with shades of chocolate, dark crimson, and violet flowers and foliage. Price, 25 cents each.

AGERATUM PRINCE ALFRED.

This is a great improvement, more dwarf in habit, of a deeper blue than any other variety; a profuse bloomer.

Price 25 cents each.

ALOYSIA, OR LEMON VERBENA.

By universal consent, the plant most esteemed for delicious sweet-scented foliage. Growth vigorous; 3 to 4 feet, the flowers inconspicuous.

Price 20 cents; \$2 per dozen.

ALTERNANTHERA.

These are foliage plants, very desirable for bedding out; they are of low compact growth, well adapted for front lines, or marginal circles in bedding groups.

ALTERNANTHERA AMABILIS. Dwarf, golden-shaded, carmine and green; very beautiful.

ALTERNANTHERA SPATHULATA. Dwarf, purple and crimson. ALTERNANTHERA VERSICOLOR. Crimson and bronze,

Price 20 cents; \$1.50 per dozen.

ALTERNANTHERA.

MAGNIFICA. This new variety has the free and compact dwarf habit, of A. Amabilis, with the picturesque rosy tints of A. Amæna. Price 50 cents.

AMARYLLIS.

These Bulbs are remarkable for their beautiful flowers; should be cultivated indoors, and but moderately watered, unless they show indications of flowering. The soil most suitable for their culture is a good, friable, decomposed turfy loam, with one-fourth part of rich leaf-mould, and the ordinary proportion of sand in mixture.

AMARYLLIS—CONTINUED. Each AULICA, (Lily of the Palace), crimson, shaded with lively green \$2.50 JOHNSONII, crimson, striped with white, and a very large bloom 3.00 LONGIFOLIA ROSEA, long leaved 50 ALBA, long leaved white 7.75 VITTATA, striped 1.50

AMARYLLIS FORMOSISSIMA, OR JACOBEAN LILY.

A beautiful summer-flowering bulb. It generally produces two stems, one after the other, each bearing a large lily-like flower of the richest crimson-velvet color; its golden stamens drooping gracefully over the lower petals, giving it additional brilliancy. Plant the bulbs early in May, in rich mellow soil. They bloom in June. Price 35 cents each; \$3.50 per dozen.

ARTHROPOGON SPICATA ARGENTEA.

A half-hardy Japan plant with long persistent foliage, distinctly striped white and green — unique, indispensable.

Price 50 cents each.

BOUGAINVILLEA.

Strong climbing plants, whose beauty is in the color of the bracts of the flowers.

GLABRA. Smooth-leaved, pink flowers, LATERITIA. Free flowering with salmon-colored bracts.

50 cents each.

BOUSSINGAULTIA VARIEGATA. A beautiful species of the Madeira Vine, but without the tendency to climb, being of shrubby style of growth; leaves variegated green and white; it will stand the hot, dry summer well, and is a great addition to our basket and vase plants. Price, 25 cents.

BRIDAL ROSE (RUBUS GRAND, fl. pl.).

Of the Blackberry tribe, flowering all the year. Flowers large, double, pure white, showy.

Price, 25 cents each; \$2.50 per dozen.

BRUGMANSIA KNIGHTII.

Tuberous rooted perennial; stout, rapid growth; foliage very large; flowers trumpet shaped. Large, pure white, double, pendant, very fragrant, profuse. Late Summer and Autumn. Roots easily wintered over in a cellar like the Dahlia.

Price, 25 cents each; \$2.50 per dozen.

CALADIUM.

Foliage somewhat of the Calla style, but beautifully spotted and variegated; of tropical origin, yet all the varieties do well in moist, rich soil here—those with most green in the leaf succeeding the best. They should not be planted out till the weather gets warm. After first autumn frosts take up bulbs, and keep in a dry, warm place till wanted for planting in spring.

Amabilis,	Fulgens,	Newmanii,	Sagittafolia,
Baraguini,	Haematostique,	Paecile,	Spider,
Belleymii,	Houlletii,	Pictum,	Vershaffelt,
Bicolor,	Javanicum,	Picturata,	Violaceum,
Brongniartii,	Marmoratum,	Porphyrophylla,	Wightii,
Duc de Nassau.	Metallicum.	Rosea picta.	

CALADIUM ESCULENTUM. The leaves are of immense size, from 18 inches to 2 feet, of shield shape. As a single plant for lawns or large flower-borders, it has few superiors.

Price, 30 cents each. Our selection, named sorts, \$3.00 per dozen.

CALADIUM—CONTINUED.

The following new varieties \$1.00 each:

DUCHARTE. Leaf ground-white, flushed rose, green veins and red spots.

DUC DE RATIBO. Green ground, with red mid ribs, marked with white spots.

fine and distinct.

CHARLES VERDIER. Fine green, with blush-pink centre and spots, MAX KOLB. Light green ground, with pale centre; novel and distinct. LUCY AND HENDERSONII. Very fine and distinct.

CENTAUREA CANDIDA.

Compact moderate grower — foliage plant, very striking, downy or velvety white. Price, 50 cents each.

CENTAUREA GYMNOCARPA.

Foliage silvery grey, most graceful and effective, especially in contrast with dark foliaged plants. In baskets and vases, its drooping, fern-like leaves are very ornamental.

Price, 30 cents each; \$3.00 per dozen.

CEREUS GRANDIFLORA (OR NIGHT-BLOOMING CEREUS).

Celebrated night-blooming green-house, or window Cactus; can be flowered readily in dwellings by giving it, over winter, a rest, with little or no water.

Price, 50 cents each.

CINERARIA MARITIMA.

Leaf plant, vigorous, with striking downy foliage. Price, 25 cents each; \$2.50 per dozen.

CINERARIA HYBRIDA.

A favorite, free-flowering plant; blooming through the greater part of the summer, and from the richness and diversity of its colors, is one of the most valuable of our spring flowering plants.

Price, 25 cents to \$1.00 each; \$2.50 per dozen.

CISSUS DISCOLOR.

Beautiful greenhouse or basket climber—leaves richly shaded dark green, purple and white, upper surfaces very velvety—full exposure to sunshine injures the brilliant markings.

CISSUS AMAZONICA. Desirable variety, leaves pointed, green, laced silver, crimson underneath.

Price 25 to 50 cents each; \$2.50 to \$4.50 per dozen.

CITRUS, ORANGE AND LEMON.

A good stock of fine healthly plants, 8 named varieties of Orange: Bouquet, Hybrid, Maltese Blood, Mandarin, Myrtifolia, Otaheite, St. Michaels, Tangerine; of Lemons five—Chinese, Japanese, Jewish, Large fruited, Variegated Leaved.

Price 50 cents to \$1.50 each. Per dozen, small plants, \$4.50.

CLERODENDRON BALFOURI.

Greenhouse climber, flowers scarlet and white, profuse, very beautiful. Double white, shrubby habit.

Price 50 cents each.

COLEUS. EMPEROR NAPOLEON.

Leaves, rich chocolate crimson, a first-class bedding variety.

Price 50 cents.

DAHLIA IMPERIALIS.

In growth a true Dahlia, habit distinct, attaining the prodigious height of 8 to 10 feet. Its majestic habit, graceful foliage, and profusion of elegantly cut, and large drooping single white, bell-shaped flowers, justly entitle it to the appellation "Imperial." A very magnificent species introduced from France. The flowers are large, late, single, recurved, reminding one of the Lily; of a transparent white, each petal shaded rose near the base, disc yellow.

Price, strong plants, 50 cents each.

DAPHNE CNŒORUM.

An old, hardy Evergreen shrub, of dense spreading habit, attaining a height of not over a foot; flowers rosy pink, very fragrant, lasting a long time in bloom.

Price \$1.00 each.

DIELYTRA SPECTABILIS-ALBA.

A new white, or nearly white, variety of this well-known, very hardy, beautiful herbaceous plant—more dwarf than the crimson—otherwise equally hardy and desirable.

Price 75 cents each.

ERANTHEMUM COOPERL

Neat, dwarf, greenhouse plant. Foliage shaded gold and bronze.

ERANTHEMUM PULCHELLUM. Dwarf greenhouse plants; beautiful blue flowers in winter.

Price 35 cents each.

ERYTHRINA CRISTA GALLI.

Beautiful summer flowering plants, with dark crimson coral like flowers. The roots, which are fleshy, can be put away in the cellar, like Dahlias during winter.

50 cents each.

ERIOBOTRYA, (ORLEANS APRICOT).

Large Evergreen leaves, with orange yellow fruit in winter, a favorite South. Price 50 cents.

FITTONIA ARGYRONEURA.

Beautiful, low-growing greenhouse plant, dark green with silver threads running over foliage.

50 cents each.

FUCHSIA. (New, imported varieties.)

WHITE EAGLE. White corolla with rich scarlet tube, and sepals recurved, a free blooming variety with three flowers at each axill. 75 cents each.

ALBERT MEMORIAL. Violet purple corolla, very large and long, immense sepals, perfectly reflexed; said to be the very best Fuchsia yet sent out. Price \$1.00 each.

ARABELLA IMPROVED. A splendid market variety, of strong habits, very large bloom, and will doubtless prove the most popular Fuchsia ever sent out. Price 75 cents each.

MONARCH. Flowers of enormous size, bright red tube and sepals, and rose colored corolla, shaded with violet; the corolla is large, of good substance and well expanded; the sepals are immensely long, and elegantly reflexed; a magnificent variety.

Price 75 cents.

AVALANCHE. A fine double white corolla Fuchsia, compact and beautifully formed; flowers of large size, of brilliant carmine scarlet.

Price \$1.00 each.

KING OF THE STRIPES. Said to be the finest striped variety ever sent out. 75 cents each.

GARDENIA, (OR CAPE JESSAMINE).

Evergreen shrub, foliage glossy and beautiful, flowers profuse, pure white, very fragrant, early in spring. Greatly esteemed in the South.

FLORIDA. Large flowers.

FORTUNEII. Chinese variety, strongest grower.

MULTIFLORA. Profuse flowered.

RADICANS. Dwarf compact, free blooming.

Price, strong plants, 50 cents each; \$4.50 per dozen.

FANCY GERANIUMS, OR STRIPED ZONALE PELARGONIUMS.

Striped Zonale Pelargoniums no longer remain to be wished for. They are constant in their markings, good growers, flower trusses of large size, and freely produced.

ARLEQUIN. Bright salmon flower, good substance, beautifully and distinctly striped with white, nice truss and dark zone foliage. New.

\$1.00 each.

COQUETTE. Clear white ground colored flower, good size and substance, beautifully striped and splashed with bright pink-salmon. Free grower and fine foliage. New.

\$1.00 each.

Also the following newly-imported varieties of Oculated Geraniums. At the time of the Catalogue going to press I have received no description of them. From the long established character of the raiser I confidently recommend them: Bride, Cynosure, Beatrice, Miss Gladstone, Mrs. Henry Cannell, Madame Werle. \$1.00 each.

GERANIUM, (TRICOLOR).

IEWISH MAID. Dwarf miniature variety, compact habit, bright carmine, scarlet zone on gold belt; very fine.

\$2.00 each. LA PHŒNIX. Good habit, flamed yellow crimson and green, occasionally

striped.

\$1.00 each.

LASS O' GOWRIE. Leaves margined white, with inner bronze zone of bright carmine rose; no description can give an idea of this beautiful variety. \$5.00 each.

PETER GREIVE. Rich gold margin and brilliant zone of flamed scarlet; a splendid variety.

\$5.00 each.

HIBISCUS COOPERII TRICOLOR.

Green or hot-house plant. Foliage striped and marbled, rose pink and white. Flowers scarlet, shaded white. Exceedingly beautiful. Price 50 cents each.

HIBISCUS.

Greenhouse shrubs; flowers and habit much like the Altheas, save in color. They are also excellent summer bedders. Lutea, double, buff, yellow; Rosea, double, rose color, and Sinensis, single, but very beautiful shaded crimson, scarlet.

Price 25 cents each; \$2.50 per dozen.

HYDRANGEA HORTENSIS.

Changeable Hydrangea, almost or quite hardy, if well littered over winter; splendid heads of bloom, flowering only from old wood.

Price 25 cents each; \$2.50 per dozen.

HYDRANGEA HORTENSIS VARIEGATA. Leaves beautifully variegated, silvery, white and green.

Price 50 cents each.

HYDRANGEA IMPERATRICE EUGENIE.

New, very beautiful, petals white, rose and light blue. Price, 50 cents each.

HYDRANGEA OTAKSA.

New Japan sort, unique, dwarfish. Flowers double pink, profuse; promises to be hardy. Very choice.

Price, \$1.50 each.

HYDRANGEA ROSALBA.

New white, changing to pink; persistent. Very fine. Price, 50 cents each.

HONEYSUCKLE, JAPAN.

Beautiful and nearly evergreen creepers; flowers very fragrant; perfectly hardy. The foliage of the Aurea Reticulata is elegantly variegated, with a net-work of yellow. purple and green. It is to me surprising these most beautiful Honeysuckles are not more extensively grown.

Price, 25 cents each; \$2.50 per dozen.

AUREA RETICULATA. Flowers white, shaded yellow.

HALLEYANA. Flowers white.

SPLENDIDA. Flowers scarlet.

IVY, ENGLISH.

The well-known European variety; valuable for covering brick walls, and upon the north and shady side of buildings.

Price, 25 cents each. \$2.00 per doz.

IVIES, NEW VARIETIES.

Leaves and vine similar to the English, but beautifully blotched. Price, 25 cents each.

IVY JAPONICA ARGENTIA. Japan. silver margined. "MARGINATA ELEGANS. Elegantly margined.

"
ROBUSTA. Stronger branched, margined fine.

LAGERSTREMIA (CRAPE MYRTLE).

Green-house shrub; but when bedded out makes the most splendid show, during July, of all shrubs. Flowers profuse, delicate pink or purple, and perfectly crimped, like lace.

NEW CRIMSON. Color a deep bright crimson, a profuse bloomer, giving immense heads of its rich flowers. Sturdy plants. \$1.00.

heads of its rich flowers. Sturdy plants, \$1.00. ELEGANS. Dwarf variety, a profuse bloomer. 50 cents.

INDICA. Medium, bright red. 50 cents.

PURPUREA. Purple. 50 cents.

REGIA. Flower pink, very large. 50 cents.

LOBELIA.

Lobelias, in moist or half shady places, are much employed in the general summer arrangement of bedding plants. To Scarlet Geraniums they form a neat and very effective edging.

ALBA, BLUE KING, ROSEA, PAXTONIANA.

Price, 15 cents each; \$1.50 per dozen.

LYCHNIS.

A very distinct, hardy, herbaceous plant from Japan; flower stalks about 9 inches high, the flowers 2 inches in diameter; handsome orange scarlet from June to October.

GRANDIFLORA, WHITE AND SCARLET, VISCARIA, FLOSCUCULI (FL. PL.), HAAGEANA.

Price, 25 cents each. \$2.50 per doz.

MANETTIA CORDATA.

Very choice, vigorous, free-flowing climbers—roots fleshy, foliage acuminate, deep green; flowers tubular, scarlet and yellow. Summer and fall. Hardy in the South. Price 25 cents; \$2.50 per dozen.

MARANTA ARUNDINACEA.

The arrow root of commerce. Price, 50 cents each.

MAURANDYA.

The most graceful and free-flowering of soft wooded climbers, either for the green-house, trellis-work or verandahs in the flower garden. The effect produced by the profusion of elegant and varied colored flowers is beautiful. Four named varieties, with white, dark blue, scarlet and bright rose-colored flowers.

Price, 25 cents each; \$2.50 per dozen.

NEREMBERGIA GRACILIS.

A very desirable bedder; growth slender, graceful; flowers most profuse, white, with faint purple tinge.

Price 15 cents each; \$1.50 per dozen.

NEREMBERGIA RIVULARIS.

Herbaceous, perennial, creeping. Flowers pure white with yellow disc, from ' Tune to September.

Price 25 cents each; \$2.50 per dozen.

OLEANDER (NERIUM).

Well known and greatly esteemed tropical shrub; excellent for bedding out. Extra fine lot of the Old Double Red.

Price 25 to 50 cents each; 10 to 24 inch, \$2.50 to \$4.50 per dozen.

The following new varieties are recommended as valuable additions to the list of Oleanders:

NERIUM PUNCTATUM PLENUM,

- ALBA DUPLEX. Double White, \$1.00 each.
 - SINGLE WHITE. 25 to 50 cents each.
- GIANT OF BATTLES. Crimson.
- COCCINEA. Scarlet.
- SPLENDIDISSIMA.
- LUTEA. Single yellow, 50 cents each.

Price, except noted, 75 cents each.

OPHIOPOGON (SPICATUM ARGENTIO MARGINATUM.)

A half hardy Japanese plant, with broad grassy leaves, edged with white, the flowers are pure white.

Price \$1.00 each.

PAMPAS GRASS.

A strong, sedgy grass from the Pampas of South America, rearing lofty silvery plumes or heads of grassy bloom and seeds. The roots winter easily in cellars. Price 30 cents each; \$3 per dozen.

PANSIES.

The Pansy or Heartsease is a general favorite, and in the early spring bloom abundantly. During the hot, dry months of summer, they cease blooming, but in the autumn they bloom again profusely.

ENGLISH, FRENCH and BELGIAN.

Price 15 cents each; \$1.00 per dozen.

PASSIFLORA (THE PASSION VINE.)

A rapid growing vine with most unique and beautiful flowers, three to four inches in diameter. Colors, white, blue, purple, scarlet and crimson shaded. Valuable for the decoration of greenhouses and conservatories, and the hardy variety succeeds perfectly in the open ground, flowering profusely the first season.

Price 25 cents each; \$2.50 per dozen.

ALATA, EMPRESS EUGENIE, INCARNATA, KERMESINA. Hardy Passionflower. Perfectly hardy in open ground, color light-blue, shaded white. TRIFASCIATA. Each leaf is intersected with three distinct bands of rosy car-

mine; a very handsome foliaged plant.

CARDINALIS. Flowers scarlet in great profusion.

50 cents each.

PENSTEMONS.

They grow in neat, compact plants of from eighteen inches to two feet in height. Gloxinia-like flowers in spikes, shaded and mottled in all colors of white, blue, scar, let, crimson and pink; in continuous bloom from June till October.

Price, 25 cents; \$2.50 per dozen.

PHLOX DRUMMONDII.

These flowers are of extreme beauty; their long duration of bloom and almost unequalled richness of color make them invaluable in every garden.

Price, \$1.00 per dozen.

PILEA MUSCOSA.

A pretty plant of drooping, graceful habit, resembling a fern in general appearance; literally covered with pretty crimson flowers; a fine basket plant. Price, 25 cents.

POINSETTIA PULCHERRIMA.

Much grown for the beautiful bract of scarlet leaves surrounding the flowers, which are small and inconspicuous — very useful in winter.

Price, 35 to 50 cents; \$3.00 per dozen.

PRIMULA.

A charming, profuse-flowering plant; indispensable for winter and spring decoration for the green-house and drawing-room.

DOUBLE, WHITE AND RED. 75 cents and \$1.00 each.

ERECTA SUPERBA. Brilliant rose-colored flowers.

KERMESINA SPLENDENS. Large flowers, brilliant color.

FILICIFOLIA RUBRA GRANDIFLORA. Flowers large.

FIMBRIATA. Flowers of a rich dazzling crimson.

Price, 20 cents each; \$2.00 per dozen.

PYCHNOSTACHYS URTICIFOLIUS.

A new green-house winter-flowering pithy shrub, vigorous growing, and very valuable, with profuse, exquisite, light-blue Salvia-like pyramidal spikes of flowers, opening first at the base; flowers best in warm place.

Price, 25 cents each; \$2.50 per dozen.

REINECKIA CARNEA FOLIA VARIEGATA.

A beautiful dwarf variegated foliage plant, with thick fleshy tuberous roots, flowers brilliant scarlet, blooming the entire season, a fine window plant of easy culture. Price, 30 cents each.

RICHARDIA ALBA MACULATA.

A bulbous plant of the Calla tribe, with beautiful spotted leaves. Flowers shaped like those of the Calla, pure white, shaded with violet inside. Bulbs need to be kept dry and from frost in winter.

Price, 50 cents each.

SEDUM.

A beautiful class of plants, well adapted for rock-work, vases and baskets, the flowers contrasting well with their foliage.

Price, 30 cents each.

SEDUM FABRIA. Flowers bright pink.

CARNEA VARIEGATUM. Leaves white and green, flowers white and sweet-scented. Price, 30 cents each.

'SIEBOLDII. Leaves light green, flowers deep rose. Price, 30 cts. each.

'VARIEGATUM. Leaves beautifully marked with yellow and green blotches. Price, 50 cents each.

SCHIZOSTYAIS COCCINNEA.

Autumn flowering bulb; spike erect, flowers crimson, two inches in diameter. Adapted to the border or pot culture.

Price, 20 cents each; \$2.00 per dozen.

SOLANUM CAPSICASTRUM.

Dwarf, neat, shrubby, six to nine inches in height—with white flowers and beautiful scarlet berries. Very useful for winter decoration.

SOLANUM JASMINOIDES VARIEGATA. Climber, with pretty variegated green and white foliage.

Price 25 cents each; \$2.50 per dozen.

TORENIA ASIATICA.

Very beautiful vase and greenhouse climber; flowers profuse, porcelain blue, with purple.

Price 25 cents each; \$2.50 per dozen.

TROPŒOLUM.

Three named sorts: single, orange, scarlet, crimson; also, double, orange scarlet, fine for vases and baskets; showy climbers; very free in winter, and excellent for bedding out.

Price 20 cents each; \$2 per dozen.

VINCA (ROSEA, ALBA PICTA AND ALBA).

Madagascar Periwinkle, three excellent shrubby bedders, perpetual bloomers, thoroughly distinct and pleasing. Alba, pure white; Alba Picta, white with pink eye; Rosea, red or roseate; height, eighteen inches.

Price 20 cents each; \$2 per dozen.

VIOLET, DOUBLE SWEET.

Six sorts—Czar, very large, single purple; Double dark purple; Neapolitan, light blue; Russian, or Schonbrun, single purple; Tree Violet; White Queen.
KING OF THE VIOLETS—Rich purple, very large, double.

Price 15 cents each; \$1.50 per dozen.

CLASS II.

LEADING PLANTS, WITH LISTS.

ABUTILON.

This tribe is of the very easiest growth in pot or border, flowering freely summer and winter. 25 cents each; per doz. \$2.00.

ABUTILON SANTANA. New, flowers large, dark brownish crimson, distinct and beautiful, the very darkest sort in cultivation.

THOMSONII. One of the very finest ornamental leaved plants—habit, erect, graceful. Leaves mottled with bright golden yellow.

ABUTILON—CONTINUED.

ABUTILON ADOLPHE BERANGER. Flowers, lemon, yellow, very large.

- VEXILLARIUM ELEGANS. Half-climbing, with a profusion of beautiful pendant scarlet, orange and pink flowers.
- VEXILLARIUM CARMINUM. Flowers abundant, carmine and yellow.
- VEXILLARIUM GRANDIFLORUM. Flowers crimson and yellow. 6.0

VON HUMBOLDT. Orange and crimson.

- ALBUM. Large downy leaves, pure white bell-shaped flowers.
- STRIATUM. The old well-known variety, flowers orange yellow, veined crimson.
- MALAKOFF. Flowers very large; color, reddish buff, veined

" MESOPOATAMICUM. A fine variety, half-drooping habit.

INTERMEDIA. A hybrid variety of the bell and flat - shaped varieties.

ACHYRANTHUS.

Splendid additions to our summer bedding plants, of dwarf habit, splendid foliage, forming a fine contrast to the coleus and other foliage plants.

Price 20 cents each; \$1.50 per doz.

ACHYRANTHUS ACUMINATA. Dark crimson, pointed leaves, veined carmine. AUREA RETICULATA. Leaves gold veined, footstalks

light carmine. BORBONICA. Dwarf habit, foliage bright crimson and

carmine. " GILSONII. Leaves bright crimson, stems pinkish, growth

46 LINDENI. Leaves lanceolate, deep blood-red, tinted purple.

66 VERSCHAFFELTII. Brilliant carmine, shaded to crimson and dark maroon.

BEGONIAS.

Desirable plants, blooming more or less profusely from November to March, varying in color from white and rose to bright scarlet. Assimilating in character to the well-known and beautiful BEGONIA REX, in their great diversity of picturesque markings, rich crimson-tinted stems and silvery leaf margins.

Price 25 cents each; \$2.50 per doz.

BEGONIA ARGYROSTIGMA, BEGONIA PARVIFOLIA, "

DUCHESS OF BRABANT, 66

REX, R. S. STEWART, " 44 FUSCHSIOIDES, 66 " SEMPERFLORENS. HYDRACOTYLIFOLIA, " .. MARY. SILVER OUEEN.

WM. WAĞNER, MRS. PIKE, NITIDA ROSEA, ZEBRINA.

BOUVARDIAS.

For Autumn and Winter blooming plants the Bouvardias are well-known to every Florist. They are of the easiest culture, giving their rich-colored flowers in great profusion. As bedding plants they are very effective.

Price 30 cents each, except noted, \$3 per doz.

BOUVARDIA LEIANTHA. Dazzling scarlet. FLORIBUNDA. Flowers orange scarlet; very distinct and fine.

" AURANTIACA. Color a bright orange; a fine summer variety. " HOGARTH. Splendid raceme; rich scarlet; vigorous grower;

fine habit. DAVIDSONII. Pure white, free grower, indispensable for winter blooming. 50 cents.

" VREELANDII. Similar to Davidsonii; said to be an improvement on that variety. 50 cents.

BOUVARDIA—CONTINUED.

BOUVARDIA ELEGANS. Color scarlet carmine; flowers and truss of immense size, larger than any other variety,

VAN HOUTII, Smooth green leaves, crimson flowers.

4.6 DELICATA. Delicate flesh.

61 JASMINOIDES. A valuable plant for bedding and conservatory groups; flowers snow white. 50 cents.

MONTHLY OR TREE CARNATIONS.

One of the most valued of all plants, either for decoration of the flower garden in summer or for the greenhouse or parlor in winter. The flowers are of nearly every shade and marking, and most of them delightfully fragrant. For winter bouquets and cut flowers, it is, perhaps, the most valuable of all flowers, as it continues in bloom from October to April.

Next to the rose, they are among our choicest flowers.

Price 25 cents each; \$2.50 per dozen.

ASTORIA. Yellow edged scarlet, white and crimson.

DEFIANCE. Large, dark crimson. GENERAL GRANT. Pure white.

GRAND CONDE. Variegated cherry and white, new color. HENRY CLAY. Fine deep crimson, vigorous grower and free bloomer.

LOUISE LENOIR. Light red, mottled with white, constant, and free.

LA PURITIE. Deep carmine, extra. LA PURITIE VARIEGATA. Blush carmine stripe.

MA GLORY. Red and yellow, showy, splendid. PRESIDENT DEGRAW. White, tinted, fine.

FLORISTS' PINKS.

More dwarf than the carnation; flowers full double, clove scented, mostly maroon, carmine and rose shades, beautifully laced with white; excellent for summer

Price, named sorts, 25 cents, \$2 per dozen.

Alice, Ella, Mrs. Stevens, Pumila, Esther, Rose of England, Annotdale, Nina, Gen. Lafayette, Sarah Howard, Brunette, Prince Arthur, " Alfred, Claude, Juliet, Laura Wilmore, Tennison, Tom Long, Double Fringed, Peony, Mrs. Hobbs, Variabilis. Pluto, Defiance.

Earl of Carlisle,

GOLDEN COLEUS.

This new section of Coleus, grown in contrast with the dark varieties the effect in the conservatory is magnificent, and for bedding purposes their rare shades of color-golden bronze, carmine bronze, brownish crimson, etc,-are wonderfully effective.

POMPONE—CONTINUED.

ENSATION. Variegated foliage, pure white flowers, fine. ALAMO. Globular, bronzy yellow. TORFRIDA. Golden amber. TURRIS EBURNEA. Fine white, petals in-curved. VIOLA. Violet, blush tipped.

DAHLIAS.

Most popular Summer and Autumn flowers, truly magnificent, almost a new Floral Creation, so improved and unlike the original. They need thorough protection from winds, with a mixture of sand in very heavy or adhesive soil. Wire hoops, set in stakes, make a neat support. The Dahlia is impatient of shade and drought, and likes DEEP, RICH, MOIST SOIL. We have never seen such displays as on our grounds for several years past.

Our collection being largely of best New Sorts, we have of many kinds but few dry roots. Where agreeable, let orders be for number of each color wanted. A full assortment by name can be better furnished from Pot Plants. These are planted from time Spring frosts cease, May 10th or 15th, to June 15th, or later on quick, warm soil. If well established and cultivated, pot plants are preferred for blooming.

In addition to the following list, I have upwards of 150 others of well-known and popular varieties, previously described in former Catalogues. When ordering, and no particular named varieties are wanted, by naming the desired colors, I can select varieties that will give better satisfaction than if selected by yourself.

In Fall, before frost, heap dirt about crowns; after tops freeze, cut them off, take up the roots, DRY OFF, and pack away in sand or ashes, in cellar where they will

not freeze.

Price: Plants in pots, 20 cents or \$2.00 per dozen. Dry roots, 40 cents each, or per dozen, our choice, \$3.50.

AGLÆ. Lilac pointed, white. ALBA AURICULATA. Beautiful light yellow, tipped scarlet. AMAZON. Beautiful orange scarlet. ANNA KEYNES. White, delicately tipped lilac. ARETHUSA. Crimson, occasionally tipped white. AUERBACK. Buff scarlet. BIANCA. Deep purple, fine.
BERTHA VON BOVIN. Red, tipped with white.
BIRD OF PARADISE. Scarletty, extra.
BIRD OF PASSAGE. White-pink edge.
BRIDE OF ROSES. Light rosy blush, cherry tipped.

CHANG. Yellow tipped and mottled with scarlet. CHARLES TURNER. Bright yellow, edged with crimson.

CLAUDIA. Scarlet, dwarf.

CLAUDE PERFECTION. Scarlet, very large. CONQUEROR. Large, white.

COSSACK. Maroon, flowers small, very compact. DOUGLASS JERROLD. Salmon pink. DR. KOSIER. Scarlet, fine form.

DR. SCHWEPPES. Scarlet, single, very compact. DUCHESS OF CAMBRIDGE. Light pink, tipped red.

DUCHESS D'ORLEANS. Purple, fine.

DUCHESS OF RICHMOND. Deep maroon.
DUCHESS OF WELLINGTON. Yellow, shaded purple.

DUKE OF NEWCASTLE. Amaranth, fine.

ERNST CARPENTER. Red, blotched white.

FIREFLAME. Scarlet, shaded white.
FLAMBEAU. Deep yellow, edged with lake.
FLYING DUTCHMAN. Yellow, tipped purple curious.

FRANZ HOFFMAN. Fine deep red. GEM OF LILLIPUTS. Fine dark scarlet.

GERMAN SUN. Beautiful golden yellow. GLADIATOR. Lemon white, pink tipped.

GRAND DUKE NICOLAS. Scarlet. GRANT THORBURN. Very large, purple.

DAHLIAS—CONTINUED.

HOFFMEISTER. Crimson. JAUNE DE PACY. Yellow

Yellow.

KANT. Pure white.
LADY DOUGLASS. Light, dotted and splashed with crimson.
LADY HERBERT. Light orange, edged crimson.

LORD BATH. Fine purple.

LORD WARDEN. White scarlet margin.

MADAME RENDATLER. Crimson, very dark.

MADAME R. LEON. Beautiful soft lilac. MADAME ZAHLER. Yellow, large, beautiful.

MAGICIAN. Purplish red. MELVINA. Purple, striped crimson.

MEPHISTOPHELES. Crimson.

MISS JOY. Buff, beautiful. MISS RUTH. Yellow, tipped white, extra.

MISS SUMNER. Lilac.

MISS TROTTER. Large, light purple.

POMPONE, OR BOUQUET DAHLIAS.

These beautiful Dahlias grow equally as free as the large varieties, and bloom more abundantly. Their brilliancy of colors and profuseness of flowers render them a great acquisition to the garden.

Their miniature size (varying from one to three inches in diameter) makes them valuable for bouquets and decorative purposes.

BLUSHING BRIDE. White, shaded lilac.

BOUQUET. White, small, perfect form, pure white.
EMPEROR. Crimson purple, edged carmine.
FREEBOV. Carmine, white base.
GERMAN DAISY, Shaded rose, merging into blush pink.
KLEINE ELSTERNIXE. Purplish crimson, free bloomer.
KLEINE HERMAN. Purple, tipped white.

KLEINE GERNGROSS. Beautiful bright scarlet.

LITTLE BESSIE. Scarlet, tipped creamy.

LITTLE DARLING. Pretty, rosy lilac.

POMPONE—CONTINUED.

LITTLE DORRITT. Deep scarlet, very double.

LITTLE ELIZABETH. Small, double lilac. LITTLE HARLEQUIN. Buff, shaded crimson.

LITTLE PHILLIP. Buff, tipped bright crimson. LITTLE PRINCE. Orange scarlet.

LITTLE SNOWBALL. Pure white, full round ball.

LITTLE WILHELMINE. Beautiful crimson, touched carmine.

LILACINA. Light lilac.

LOUIS SPATH. Yellow and purple. MARY WELLS. Yellow, tipped scarlet.

MARKRANSTADT. Small, crimson and buff, quilled.

OLIVIA. Rich deep crimson.

SNOWFLAKE. Beautiful pure white, compact grower.

FUCHSIAS.

NEW VARIETIES OF 1871.

In shaded situations, with plenty of air and light, Fuchsias make very elegant summer blooming plants; they prefer light, rich soil, and when growing, to be freely supplied with water; they are also superb plants for the conservatory or greenhouse, in early summer. Great additions have been made to this popular plant, in the New Double, the Double and Single White Corollas, and the ornamental foliage varieties.

ALBERT MEMORIAL. Violet-purple corolla, very large and long, immensely broad, thick, leathery sepals, perfectly reflexed, very free; said to be the very

best double Fuchsia yet sent out. \$1.00 each.
ARABELLA IMPROVED. A decided improvement on the good old variety called Arabella. A splendid market variety, of strong habit, very large bloom, and yill doubtless prove the most popular light Fuchsia ever sent out. Price 75 cenes each.

AVALANCHE. A fine, double-white corolla Fuchsia, compact and beautifully formed, flowers of extra size, of brilliant carmine scarlet. \$1,00 each.

BEACON. A fine, large flower, with deep rose tube and sepals, and bright carmine corolla, shaded with violet, and marked with rose at the base; the corolla is of immense size, and good substance. 75 cents.

CARRIE SYMES. Coral red, white corolla, extra fine. 75 cents each.

DICTATOR. Bright red tube and sepals, the latter tipped with green and completely reflexed; corolla of a bright violet plum color, marked with rose at the base; a very attractive variety. 75 cents each.
H. G. HENDERSON. Large bright coral scarlet, tube and sepals very large,

GERANIUMS, (NEW DOUBLE).

NEW VARIETIES OF 1871.

The class of Double Flowered Geraniums forms an interesting and valuable addition to the floral world, not only for their novelty, but their great value for bedding purposes. They have proved themselves superior to the single varieties, not being so much affected by the heat of summer, throwing up their immense heads of gorgeous flowers, and, like all double flowers, being of long duration.

BOUCHARLAT AINE. A new continental variety. \$1.00.

C. GLYM. Orange scarlet; very dwarf. \$1.00.

CONQUEROR. Flowers large and full rich vermillion color, with a conspicuous white eye; very handsome and attractive; excellent for pot culture and a firstrate bedder. 75 cents.

CONSUL. Very full and double, with immense trusses of bright carmine flowers produced in the greatest profusion. 75 cents.

CROWN PRINCE. Flowers of a deep rose carmine color, most distinct in character from existing varieties. Shirley Hibberd, speaking of this variety, says the color is delightful, and surpasses every variety single or double. \$2.00.

GERANIUMS—CONTINUED.

GOLIAH. A new continental double variety. \$1.00.

KING OF THE DOUBLES. The largest and best shaped pip of all the doubles. Color, a beautiful bright cerise, and very free; a noble variety. \$1.00.

Color, a beautiful origin cerise, and very free; a noble variety. \$1.00.

LOUIS VAN HOUTE. A dark scarlet, with long foot stalks to each pip. \$1.00.

MADAME BOULARD. Vivid rose; very dwarf. \$1.00.

MADAME GEBHARD. Lake carmine; very large. \$1.00.

MONT DE ST. JEAN. Immense trusses of large salmon-tinted, rose-colored flowers; probably the largest fully expanded of the double flowers. \$1.00.

MR. GLADSTONE. Large flowers, rich rose tinted with orange. \$1.00.

MEMMON. Rosette-like flowers, of a bright and attractive rosy scarlet color, of

good compact habit and beautifully formed. 75 cents.

SCEPTRE LORAINE. Cerise, very dwarf, of free habit. \$1.00. VICTOR LEMOINE. Dazzling scarlet, trusses and blooms of fine quality, \$1.00. VILLE DE NANCY. Fine large rosy carmine flowers. 75 cents.
